

Canon

Document Scanner **DR-2580C**

User's Guide

Please read this manual before using this unit. After you finish reading this manual, keep it in a safe place for future reference.

FCC REGULATIONS (For 120 V model)

Document Scanner, Model M11052

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canon U.S.A. Inc.

One Canon Plaza, Lake Success NY 11042, U.S.A.

Tel. No. (516)328-5000

RADIO INTERFERENCE REGULATIONS (For 120 V models)

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the Interference-causing equipment standard entitled "Digital Apparatus", ICES-003 of the Industry Canada.

RÈGLEMENT SUR LE BROUILLAGE RADIOÉLECTRIQUE (For 120 V models)

Cet appareil numérique respecte les limites de bruits radioélectriques applicables aux appareils numériques de Classe B prescrites dans la norme sur le matériel brouilleur: "Appareils Numériques", NMB-003 édictée par l'Industrie Canada.

MODEL NAMES

The following names may be provided for the safety regulations in each sales region of the Document Scanner.

DR-2580C: Model M11052

READ CAREFULLY BEFORE OPENING THE SEALED DISK PACKAGE

CANON SOFTWARE LICENSE AGREEMENT

IMPORTANT-READ THIS AGREEMENT BEFORE OPENING THE SEALED DISK PACKAGE! BY OPENING THE SEALED DISK PACKAGE, YOU ARE DEEMED TO AGREE TO BE BOUND BY THIS AGREEMENT.

This legal document is a license agreement between you and Canon Electronics Inc. ("Canon"). BY OPENING THE SEALED DISK PACKAGE, YOU ARE DEEMED TO AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, DO NOT OPEN THE SEALED DISK PACKAGE AND PROMPTLY RETURN THE CANON SCANNER, THE DISK PACKAGE CONTAINING SCANNER DRIVER SOFTWARE PROGRAMS AND/OR SCANNER UTILITY SOFTWARE PROGRAM PROPRIETARY TO CANON OR ITS LICENSOR (THE "SOFTWARE") AND THE ACCOMPANYING DOCUMENTATION AND OTHER ITEMS TO THE PLACE WHERE YOU OBTAINED THEM FOR A REFUND BEFORE THEY ARE USED OR OPENED OR UNPACKED.

In consideration of the right to use the SOFTWARE, you agree to abide by the terms and conditions of this Agreement.

1. GRANT OF LICENSE: Canon grants you the personal, non-exclusive right to use the SOFTWARE only on a single computer. You shall need to obtain multiple licenses separately from Canon when you shall install the SOFTWARE on multiple computers.

You shall not assign, sublicense, sell, rent, lease, loan, convey or transfer to any third party, or send or bring the SOFTWARE out of the country where you originally obtain it to other countries without required authorization of applicable governments, or copy, duplicate, translate or convert to another programming language the SOFTWARE or accompanying documentation, except as expressly provided herein.

Except as expressly permitted under the applicable law, you shall not alter, modify, disassemble, decompile or otherwise reverse engineer the SOFTWARE or accompanying documentation and you also shall not have any third party do so.

2. BACK-UP COPY: You may make one copy of the SOFTWARE solely for a back-up purpose or copy the SOFTWARE onto the permanent storage device (e.g. a hard disk) of your computer and retain the original for a back-up purpose. Except as expressly permitted under the applicable law, any other copying of the SOFTWARE is a violation of this Agreement. You must reproduce and include the copyright notice on the back-up copy.

3. SUPPORT AND UPDATE: Canon, Canon's affiliate, their distributor or dealer is not responsible for maintaining or helping you to use the SOFTWARE. No updates, fixes or support will be made available for the SOFTWARE.

4. LIMITED WARRANTY AND DISCLAIMER OF INDEMNITY: Canon, Canon's affiliate, their distributor or dealer will not guarantee uninterrupted service, or absence or correction of errors. Therefore, the SOFTWARE is licensed on an "AS IS" basis without warranty of any kind. The diskette on which the SOFTWARE is recorded is warranted against defective material or workmanship under normal use for a period of ninety (90) days from the date you purchased the same as evidenced by a receipt or otherwise. The limited warranty does not apply if the failure of the diskette resulted from accident, abuse or misapplication of the SOFTWARE and shall not extend to anyone other than the original user of the SOFTWARE.

CANON, CANON'S AFFILIATE, THEIR DISTRIBUTOR OR DEALER DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SOFTWARE OR ACCOMPANYING DOCUMENTATION.

NEITHER CANON, CANON'S AFFILIATE, THEIR DISTRIBUTOR NOR DEALER IS LIABLE FOR ANY LOSS OR DAMAGE INCLUDING CONSEQUENTIAL OR INCIDENTAL LOSS OR DAMAGE SUCH AS LOSS OF PROFITS, EXPENSE OR INCONVENIENCE, WHATSOEVER CAUSED BY OR ARISING OUT OF THE SOFTWARE, ACCOMPANYING DOCUMENTATION OR THE USE THEREOF.

CANON, CANON'S AFFILIATE, THEIR DISTRIBUTOR OR DEALER SHALL HAVE NO OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE, ACCOMPANYING DOCUMENTATION OR THE USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

THE ABOVE IS CANON'S ENTIRE LIABILITY AND YOUR EXCLUSIVE REMEDY IN CONNECTION WITH THE SOFTWARE AND ACCOMPANYING DOCUMENTATION.

5. TERM: This Agreement is effective upon opening the sealed disk package and remains in effect until terminated. You may terminate this Agreement by destroying the SOFTWARE and any copy thereof. This Agreement will also terminate if you fail to comply with any of the terms of this Agreement. In addition to Canon enforcing its respective legal rights, you must then promptly destroy the SOFTWARE and any copy thereof.

6. U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE: The SOFTWARE is provided with RESTRICTED RIGHTS. Use, duplication or disclosure is subject to restrictions as set forth in either subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraph (c) (1) and (2) of the Commercial Computer Software Restricted Rights Clause at FAR 52.227-19, as applicable.

7. SEVERABILITY: In the event that provision of this Agreement is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this Agreement shall remain in full force and effect.

8. ACKNOWLEDGEMENT: BY OPENING THE SEALED DISK PACKAGE, YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTOOD IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU ALSO AGREE THAT THIS AGREEMENT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN YOU AND CANON CONCERNING THE SUBJECT MATTER HEREOF AND SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, VERBAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN YOU AND CANON RELATING TO THE SUBJECT MATTER HEREOF. NO AMENDMENT TO THIS AGREEMENT SHALL BE EFFECTIVE UNLESS SIGNED BY A DULY AUTHORIZED REPRESENTATIVE OF CANON.

Should you have any questions concerning this Agreement, or if you desire to contact Canon for any reason, please write to Canon's local affiliate.

International ENERGY STAR® Office Equipment Program

As an ENERGY STAR® Partner, Canon Electronics Inc. has determined that this machine meets the ENERGY STAR® Program guidelines for energy efficiency.

The International ENERGY STAR® Office Equipment Program is an international program that promotes energy saving through the use of computers and other office equipment. The program backs the development and dissemination of products with functions that effectively reduce energy consumption. It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment, such as computers, monitors, printers, fax, machine, copiers, and scanners. The standards and logos are uniform among participating nations.

Trademarks

- Canon and the Canon logo are registered trademarks of Canon Inc. in the United States and may also be trademarks or registered trademarks in other countries.
- Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and other countries.
- ISIS is a trademark of EMC Corporation, in the United States.
- Intel and Pentium are registered trademarks of Intel Corporation.
- ENERGY STAR® is a U.S. registered mark.
- Adobe is the registered trademark of Adobe Systems Incorporated in the United States and/or other countries.
- Adaptec is registered trademark of Adaptec Inc.
- Other product and company names herein may be the trademarks of their respective owners.

INTRODUCTION

Thank you for purchasing the Canon DR-2580C document scanner. Please read this manual thoroughly before using the machine to familiarize yourself with its capabilities, and to make the most of its many functions. After reading this manual, store it in a safe place for future reference.

Manuals for the Scanner

The DR-2580C Scanner has an Easy Start Guide and a User's Guide (this manual) included in the package, and a CapturePerfect 3.0 Operation Guide and Online Help.

For details on checking the packing list, software installation, computer connections, and scanner setup, see the Easy Start Guide. For details on preparing the scanner, and details on scanning and how to handle the scanner, see the User's Guide.

The following describes the manuals packaged with the scanner. Before you start using the scanner, be sure to read this User's Guide.

Easy Start Guide

This manual describes the procedure for removing the scanner from its box through to setting up the scanner for scanning.

User's Guide (this manual)

This manual describes the basic operations for using the scanner, performing routine maintenance, and troubleshooting, and provides the scanner specifications.

CapturePerfect 3.0 Operation Guide (PDF manual)

CapturePerfect 3.0 and its Operation Guide are both installed on your computer with CapturePerfect 3.0 Operation Guide. (See p. 32.)

Symbols Used in This Manual

The following symbols are used in this manual to explain procedures, restrictions, handling precautions, and instructions that should be observed for safety.

WARNING

Indicates a warning concerning operations that may lead to death or injury to persons if not performed correctly. To use the machine safely, always pay attention to these warnings.

CAUTION

Indicates a caution concerning operations that may lead to injury to persons, or damage to property if not performed correctly. To use the machine safely, always pay attention to these cautions.

IMPORTANT

Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the machine correctly, and avoid damage to the machine.

Note

Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended.

1. Important Safety Instructions

To ensure the safe operation of this scanner, be sure to read the safety warnings and precautions described below.

Installation Location

The performance of this scanner is affected by the environment in which it is installed. Make sure that the location where the scanner is installed meets the following environmental requirements.

- Provide adequate space around the scanner for operation and maintenance.
- If scanned documents are ejected to the back of the scanner, provide adequate space behind the scanner for documents ejected after being scanned. (See p. 22.)
- Avoid installing the machine in direct sunlight. If this is unavoidable, use curtains to shade the scanner.
- Avoid locations where a considerable amount of dust accumulates.
- Avoid warm or humid locations, such as in the vicinity of a water faucet, water heater, or humidifier, and avoid locations where the fumes from ammonia, paint thinner, or other volatile chemicals may be present.
- Avoid locations where ammonia gas is emitted.
- Avoid locations near volatile or flammable materials, such as alcohol or paint thinner.
- Avoid locations that are subject to vibration.
- Avoid exposing the scanner to rapid changes in temperature. If the room in which the scanner is installed is cold but rapidly heated, water droplets (condensation) may form inside the scanner. This may result in a noticeable degradation in scanning quality.
 - The following conditions are recommended for optimal scanning quality:
 - Room temperature: 10 °C to 32.5 °C (50 °F to 90.5 °F)
 - Humidity: 20% to 80% RH
- Avoid installing the scanner near equipment that generates a magnetic field (e.g. speakers, televisions, or radios).

Power

- Connect only to a power outlet of the rated voltage and power supply frequency. (either 120 V, 60 Hz or 220-240 V, 50/60 Hz depending on your region)
 - Do not use a power supply that is not rated for the specified voltage. Doing so might cause fire or electric shock.
 - Do not connect other electrical equipment to the same power outlet to which the scanner is connected. Also, when using an extension cord, make sure that the extension cord is rated for the current requirements of the scanner.
 - Never try to disassemble the AC adapter or modify it in any way, as this is extremely dangerous.
 - The power cord and AC adapter may become damaged if they are often stepped on or if heavy objects are placed on them. Continued use of a damaged power cord and AC adapter can lead to an accident, such as a fire or electrical shock.
 - Do not use the power cord while it is coiled.
 - Do not pull directly on the power cord. When disconnecting the power cord, grasp the plug and remove it from the outlet.
 - Keep the area around the power plug clear of objects so that the power cord can be disconnected easily in an emergency.
 - Use only the AC adapter provided with this scanner. Also, do not use the AC adapter provided with the scanner with any other electrical devices.
- Model: MG1-4315
- If you have any questions regarding the power supply, contact your local authorized Canon dealer or service representative for further information.

Moving the Scanner

- When moving the scanner, always hold it with both hands to avoid dropping it. The scanner weighs approximately 3.9 lb (1.8 kg) alone, and approximately 7.9 lb (3.6 kg) with the optional flatbed scanner unit installed.

With Optional Flatbed
Scanner Unit Installed

- Make sure that the flatbed scanner unit is correctly attached to the DR-2580C scanner before moving the scanner.

-
- Make sure to disconnect the interface cable and power cord. If the scanner is transported with these items plugged in, the plugs and connectors may be damaged due to physical shock.

Handling

WARNING

Note the following precautions whenever using the scanner. Failure to do so may result in a fire or electric shock.

- Never use alcohol, benzene, paint thinner, aerosol sprays, or any other highly flammable substance near the scanner.
- Do not cut, damage, or modify the power cord or AC adapter. Do not place heavy objects on the power cord or AC adapter, and do not pull or excessively bend the power cord.
- Never connect the power cord when your hands are wet.
- Do not connect the scanner to a multi plug power strip.
- Do not knot or coil the power cord as this may result in a fire or electric shock. When connecting the power cord, make sure that the power plug is securely and completely inserted into the power outlet.
- Do not use power cords and AC adapters other than the power cord and AC adapter provided with this scanner.
- Never try to take the scanner apart or modify it in any way.
- Never try to take the AC adapter apart or modify it in any way, as this is dangerous and may lead to a fire or electric shock.
- Do not use flammable aerosol sprays products near the scanner.
- When cleaning the scanner, turn the power switch OFF and disconnect the power cord from the power supply.
- Clean the scanner using a slightly dampened cloth which has been well wrung out. Never use alcohol, benzene, paint thinner, or any other flammable substances.
- If the scanner makes strange noises, or gives off, smoke, heat, or strange odors, or the scanner does not function or other abnormalities occur when you use the machine, immediately turn the power switch OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or the service representative for further information.
- Do not drop the scanner, or subject it to impact or strong shock. Should the scanner ever become damaged, immediately turn the power switch OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced.
- Before moving the scanner, be sure to turn the power switch OFF, and disconnect the power plug from the power outlet.

**CAUTION**

- Do not install the scanner on a surface that is unstable or tilted, or in an area subject to excessive vibrations, as this may cause the scanner to fall, resulting in personal injury or damage to the scanner.
- Never place small metal objects such as staples, paper clips, or jewelry on the scanner. These items may fall into the scanner, and cause a fire or electric shock. Should such objects ever fall inside the scanner, immediately turn the power switch OFF, and disconnect the power plug from the power outlet. Then, contact your local authorized Canon dealer or service representative to have the unit serviced.
- Do not locate the scanner in a humid or dusty location. Doing so might cause fire or electric shock.
- Do not place objects on top of the scanner. Such objects may tip or fall over, resulting in personal injury.
- When unplugging the power cord, grasp it firmly by its plug. Do not pull directly on the power cord, as this may damage or expose the cord's internal wiring, resulting in a fire or electric shock.
- Leave sufficient space around the power plug so that it can be unplugged easily. If objects are placed around the power plug, you will be unable to unplug it in an emergency.
- Do not allow water or flammable substances (alcohol, paint thinner, benzene, etc.) to spill into the scanner, as this may result in a fire or electric shock.
- Turn OFF the power switch for safety when not using the scanner for a long period of time, such as overnight. Also, turn OFF the power switch, and disconnect the AC adapter from the scanner and disconnect the power cord from the power outlet for safety when the machine will not be used for an extended period of time, such as during consecutive holidays.
- Do not wear loose clothing or jewelry that may get caught in the scanner while you are using it. This may result in personal injury. Be extra careful of neckties and long hair. If anything becomes caught in the scanner, immediately disconnect the power cord to stop the scanner.
- Be careful when placing paper in the scanner and when removing jammed paper. It is possible to cut your hand on the edge of a sheet of paper.

Disposal

- When disposing of this scanner, be sure to follow all local ordinances and laws or consult with the retailer who sold you the scanner.

2. Features of the DR-2580C Document Scanner

The main features of the DR-2580C document scanner are described below.

■ **Fast Document Feeding**

The scanner can scan a maximum of 25 documents per minute in a range of sizes from business cards to LTR/A4 size. (Scanning conditions: Black and white, LTR/A4 size portrait, two sided, 200 dpi.)

■ **USB 2.0 Interface**

Hi-Speed USB 2.0 Interface is supported.

■ **Waiting Time Is “0”**

The DR-2580C is ready to scan after the power is turned ON without a waiting time.

■ **Color/Grayscale Support**

Documents can be scanned in 24-bit color or 256-level grayscale.

■ **Supports a Variety of Scanning Modes**

The scanner supports the following scanning modes, depending on the document type:

- Single-sided/double-sided mode
- Single sheet/dual feeding path

■ **U-Turn Path**

Documents are fed and ejected from the front of the scanner. (See p. 23.)

■ **Straight Path**

Documents are ejected to the back of the scanner. Note, the ejected documents are stacked in reverse order to how they were fed. (See p. 24.)

■ **Paper Size Detection**

The scanner automatically detects the size of a scanned document and eliminates any unnecessary space around the edges of the image when storing it, even when storing a document of irregular size.

■ **Card Scan**

It is possible to scan business card. (See p. 18.)

■ **Folio Scan**

A folio (folded in half) document can be set for scanning as it is, and the scanned images of both sides are combined as a single image. (See p. 49.)

■ **Deskew**

The Deskew function automatically straightens an image if the document was loaded askew.

■ **Character Orientation Detector**

Identifies the orientation of characters in a document, and rotates the image so the orientation of the scanned characters is straight.

■ **Advanced Text Enhancement**

Documents with dark backgrounds or documents with faint text written in pencil can be scanned clearly.

* This function sometimes does not function effectively on some documents.

■ **Dropout Color**

The scanner is equipped with a Dropout Color function that allows you to specify a color for the scanner to omit from scanned images.

■ **Skip Blank Page Function**

The scanner is equipped with a Skip Blank Page function that allows it to scan a document regardless of whether every document is two-sided or onesided.

■ **Prescan Function**

The scanner is equipped with a Prescan function that allows you to adjust the contrast and brightness of a prescanned image and then send the adjusted image to the application software, without needing to scan the document again.

■ **Remove Binder Holes**

Deletes black spots left when scanning documents that have had holes punched in them to be stored in a binder.

■ **Auto Start**

The scanner is equipped with an Auto Start function that automatically initiates scanning when a document is placed in the document feed tray.

■ **Long Paper Compatibility**

You can scan documents that are a maximum of 1,000 mm long in the Long document mode. (See “Long Document Mode,” on p. 50.)

■ **Compatible with Carbonless Duplicating Paper**

The scanner is able to scan carbonless duplicating paper.

■ **Job Function**

Executing a scan with one of the scanner’s job buttons automatically performs the specified process (save, print, mail attachment). (See p. 36.)

■ **Flatbed Scanner Unit (Option)**

The flatbed scanner unit can be attached to and used with the DR-2580C scanner. Contact your local authorized Canon dealer for more detailed information. (See p. 54.)

■ **Energy Saving Mode**

This scanner is compatible with the International Energy Star Program, and is designed to save power by using the energy saving feature except when scanning is being performed.

Note

Some functions may not be available depending on the software you are using.

3. Names and Functions of Parts

This section describes the name and function of each part. Make sure to read this section and familiarize yourself with the parts of the scanner before using the scanner.

■ Front

■ Rear

■ Side (Interfaces)

CAUTION

Do not touch the connector's pins or contacts. Doing so may damage the scanner.

4. Installation Requirements

To use the DR-2580C, your computer must satisfy the following system requirements.

- One of the following operating systems:
 - Microsoft Windows 98SE
 - Microsoft Windows Me
 - Microsoft Windows 2000 Professional SP4 or later
 - Microsoft Windows XP Professional SP2 or later
 - Microsoft Windows XP Home Edition SP2 or later
- A computer that meets the following specifications:
 - CPU: Pentium4, 1.5 GHz or faster
 - Memory: 512 MB or more
 - Hard disk: 1 GB or more available space
 - Hi-Speed USB 2.0 interface
 - Monitor: Resolution of 1024 × 768 (XGA) or better recommended.
- USB interface connections vary according to the operating system as shown below.
 - Windows 98SE/ME: USB Full-Speed (equal to USB 1.1)
 - Windows 2000/XP: Hi-Speed USB 2.0/USB Full-Speed (equal to USB 1.1)
- An ISIS-compatible application or a TWAIN-compatible application that is compatible with the above operating systems.

IMPORTANT

- If you do not know the requirements for your computer system, contact the store where you purchased the computer or the manufacturer of the computer for more information.
- Use the most recent version of the USB 2.0 driver provided by Microsoft. Contact your local authorized Canon dealer or service representative for more detailed information.
- Not all USB interfaces provided as standard with personal computers are guaranteed. Contact your local authorized Canon dealer for more detailed information.
- Scanning speeds are lower if your computer's standard USB interface is USB Full-Speed (equal to USB 1.1).
- Use the USB cable provided with the scanner, or a Hi-Speed USB 2.0 compatible cable.
- If the CPU, memory, interface card, and other specifications do not satisfy the installation requirements, the scanning speed may be greatly reduced and transmission may take a long time.
- Even if the computer satisfies the recommended specifications, the scanning speed may vary, depending on the scan settings.

-
- The ISIS/TWAIN Drivers provided with the scanner do not necessarily operate on all ISIS- or TWAIN-compatible applications. For details, contact your application software retailer.

5. About the Setup Disc

The Canon DR-2580C scanner setup disc contains the software listed below:

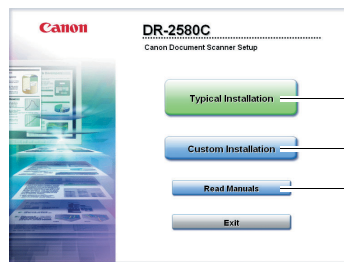

- **DR-2580C Driver**
Scanner driver for use with the DR-2580C scanner, and the Job Registration Tool.
- **CapturePerfect 3.0**
ISIS-compatible application developed for Canon document scanners.

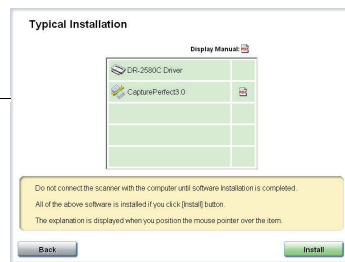

Note

- The following shows how the DR-2580C setup disc is configured. For instructions on how to install the software included on the setup disc, see the Easy Start Guide.

Menu screen

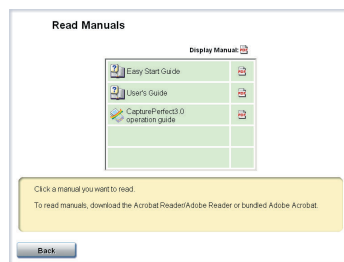

Typical Installation

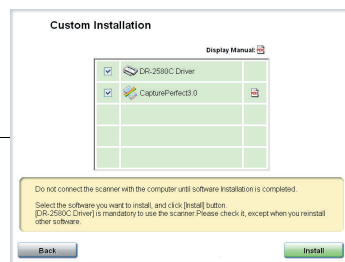

* All of the indicated software is installed.

Read the manual

* The "Easy Start Guide", "User's Guide" and "CapturePerfect 3.0 operation guide" provided with the scanner.

Custom Installation

* Only the software selected in the checkboxes is installed.

1. Documents

This scanner can scan documents ranging in size from business cards and checks to LTR/A4 size documents. The size of documents that can be scanned is shown below.

Eject Direction (*1)	U-Turn Path	Straight Path
Width	2.08" to 8.5" (53 mm to 216 mm)	2.08" to 8.5" (53 mm to 216 mm)
Length(*2) (*3)	2.75" to 13.9" (70mm to 355.5 mm)	2.75" to 13.9" (70 mm to 355.5 mm)
Weight (*4) Feeding documents are separated	14 to 32 lb bond (52 to 128 g/m ²) 0.0024" to 0.0059" (0.06 mm to 0.15 mm)	11 to 40 lb bond (42 to 157 g/m ²) 0.0020" to 0.0079" (0.05 mm to 0.20 mm)
Feeding documents are not separated	11 to 40 lb bond (42 to 157 g/m ²) 0.0020" to 0.0079" (0.05 mm to 0.20 mm)	11 to 40 lb bond (42 to 157 g/m ²) 0.0020" to 0.0079" (0.05 mm to 0.20 mm)
Business Cards	Cannot be scanned	Can be scanned (not separated) Size: 2.12" × 3.37" (53.9 mm × 85.5 mm) Thickness: 0.03" ± 0.003" (0.76 ± 0.08 mm) without embossing

(*1) For information about the output directions, see “Document Eject Tray,” on p. 22.

(*2) If the document is longer than 11.7" (297 mm), use the bypass mode with feed selection lever for document scanning. (See p. 28.)

(*3) When the scanner is set to Long Document mode it can scan documents on paper that is up to 1,000 mm long. See “Long Document Mode,” on p. 50 for details about Long Document mode.

(*4) For information about feeding a document, see “Placing Documents,” on p. 25.

IMPORTANT

A document must meet the following criteria to be scannable:

- When scanning a multipage document, pages must be grouped together so that they have the same size, thickness, and weight. Scanning different types of paper at one time can cause the scanner to jam.

- When using the U-Turn path to scan a document that is longer than 11.7" (297 mm), use the bypass mode and feed pages one at a time. Attempting to use the U-Turn path for continuous feed scanning of a document that is longer than 11.7" (297 mm) can cause the document pages to fall onto the feed tray and become jammed in the scanner.
- Scanning documents before the ink is dry can cause problems with the scanner. Always make sure that the ink on a document is dry before scanning it.
- Scanning documents that are written in pencil or similar material can make the rollers dirty, which can then transfer the dirt to subsequent documents. Always clean the rollers after scanning a document written in pencil.
- When scanning a two-sided document that is printed on thin paper, the image on the opposite side of each page may show through. Adjust the scanning intensity in the application software before scanning the document.
- Scanning the following types of documents can cause a paper jam or malfunction. To scan such a document, make a photocopy of the document and then scan the photocopy.

Wrinkled or creased documents

Documents with paper clips or staples

Extremely thin, translucent paper

Curled document

Carbon paper

Torn documents

Coated paper

- Note that glossy documents or business cards sometimes cannot be scanned correctly, or functions such as paper size detection and deskew do not function properly due to reflected light.
- When scanning business cards, make sure to select the bypass mode and straight path.

CAUTION

The results of scanning embossed cards are not guaranteed. Note that scanning embossed cards may scratch the sensor glass.

Embossed Card

2. Preparing the Trays

Prepare the document feed tray and document eject tray according to the paper size and feed/eject method.

Setting Up the Document Feed Tray

Pull the document feed tray towards you to open it.

Setting the Document Guide Adapters

If scanned documents are skewed or to scan folios or documents on extra-long paper, install the document guide adapters according to the procedure below and then scan the documents.

1. Pressing the OPEN knob from both sides, raise the upper unit.

OPEN Knob

2. Set the document guide adapters onto the document guides.

**Note**

Cover the document guides from above with the document guide adapters, and insert them as far as they will go, until they click into place.

3. Carefully close the upper unit.

**IMPORTANT**

Do not force the upper unit to close. Doing so can damage the scanner.

4. Be sure that the upper unit is completely closed by pushing on both edges with both hands until you hear a click.

IMPORTANT

- Do not hold the tips of the document guide adaptors when moving them. Doing so can damage the document tray.

- Before removing the document guide adaptors, be sure to open the upper unit first. Using undue force when removing the document guide adaptors can damage the document tray.

Document Eject Tray

The scanner has two eject methods: documents can be ejected to the front of the scanner in a U-Turn path, or to the back of the scanner in a Straight Path. The eject method can be switched by moving the eject selection lever up and down. Select the eject method according to what you need to do.

Note

- The U-turn path is used to scan documents on paper of normal thickness. Scanned documents are ejected to the document eject tray.
- The straight path is used to scan documents on thin paper, base paper and business cards that cannot be scanned through the U-turn path. Scanned documents are ejected to the back of the scanner.

Using the U-Turn Path

1. Lower the eject selection lever.

Scanned documents will be ejected to the document eject tray.

Eject Selection Lever

2. Pull the document eject tray extension towards you to open it.

IMPORTANT

- Be careful when opening the document eject tray extension. Forcing it open can damage it.
- Never try to raise the document eject tray extension more than necessary. Doing so can damage it.
- Do not place anything other than documents on the document eject tray extension. Doing so can damage it.
- Make sure the document eject tray extension is open when using the scanner. If the document eject tray extension is not opened, ejected documents can fall from the tray and become jammed in the scanner.

Using the Straight Path

1. Raise the eject selection lever.

Scanned documents will be ejected to the back of the scanner.

Note

When using the straight path, the ejected documents are stacked in reverse order to how they were fed.

IMPORTANT

- Be sure there is enough space for documents that are ejected behind the scanner when using the straight path. If there is not enough space for ejected documents, the documents may be damaged or a paper jam may occur.
- Switch the position of the eject selection lever before you start scanning. Changing the lever position while scanning is being performed can cause jamming.

3. Placing Documents

There are two methods for paper separation, called the page separation mode and bypass mode for feeding documents. Feeding documents continuously from a stack of documents placed in the feed tray is called the page separation mode. Feeding documents one sheet at a time by hand or feeding multiple sheet documents, such as invoices that are attached at one end, is called the bypass mode. The document feed method can be switched by moving the feed selection lever.

IMPORTANT

- Before you place a document, check to make sure it does not contain paper clips, staples, or other small metal objects. These objects may damage the document, or cause a paper jam or scanner malfunction.
- Do not wear loose clothing or jewelry that may get caught in the scanner while you are using it. This may result in personal injury. Be extra careful of neckties and long hair. If anything becomes caught in the scanner, immediately disconnect the power cord to stop scanning.
- Always smooth out any folds or curls in your documents before placing them into the feeder. If the leading edge of a document is curled, it may cause a paper jam.

How to Feed with the Page Separation Mode

1. Move the feed selection lever to the page separation (☰) side.

Feed Selection Lever

-
2. Straighten the edges of the stack of documents to be scanned.

⚠ CAUTION

- Do not place the documents on top of the scanner to align them. Doing so may cause a malfunction.
- Be careful when placing a document in the scanner. It is possible to cut your hand on the edge of a sheet of paper.

3. Set the document guides so they are wider than the document to be scanned.

👉 IMPORTANT

Do not hold the tips of the document guide adaptors when moving them. Doing so can damage the document tray.

4. Place the documents face up into the feed tray, so that they touch the stoppers.

**IMPORTANT**

There is a load limit mark (▼) on the document guides. Do not stack documents higher than this mark (approximately 50 sheets of 20 lb bond (80 g/m²) paper). Doing so may cause a paper jam.

5. Adjust the document guides so they match the width of the document.

**Note**

Before starting a scan, make sure that the document is loaded in the scanner correctly. Scanning a curled document or a creased document can damage the document.

6. Start scanning from the application.

IMPORTANT

- If the paper feed operation stops due to a system error or a paper jam while the scanner is scanning, resolve the problem, make sure that the scanned image of the last page that was fed has been stored, and then resume the scanning operation.
- Note that documents that are printed on thin paper may fall out of the document eject tray.
- After you finish scanning, close the document feed tray and the document eject tray extension to prevent damage to the scanner while it is not being used.

How to Feed with the Bypass Mode

1. Move the feed selection lever to the nonseparated document (⌘) side.

Feed Selection Lever

2. Place the document into the document feed tray one sheet at a time, so that it touches the stoppers, and adjust the position of the document guides.

3. Start scanning from the application.

4. The document is pushed against the document feed slot and is fed into the scanner.

IMPORTANT

- When scanning documents that are fastened together, such as invoices, set the edge that is fastened together as the leading edge.
- Note that when scanning with nonseparated feed, if you place several documents that are not fastened together on the feed tray at one time, they will be fed together.
- In particular, very thin or curled documents will not be fed very well. In this case, lightly press on the leading edge of the documents as you feed them.

- After you finish scanning, close the document feed tray and the document eject tray extension to prevent damage to the scanner while it is not being used.

4. Scanning Documents

There are two methods of scanning documents using the DR-2580C document scanner. You can scan from an application, such as CapturePerfect 3.0, or you can use the Job function, which allows you to scan by pressing the scan buttons on the operation panel, without starting up an application.

This section describes the scanning flow of the CapturePerfect 3.0 application and the Job Function.

For details on how to install each application and the driver, see the Easy Start Guide.

Using CapturePerfect 3.0

CapturePerfect 3.0 is an ISIS-compatible application developed for Canon document scanners.

CapturePerfect 3.0 includes the following modes. Select the desired scan mode from the scan menu to perform scanning.

- **Scan Batch to File**
Documents are scanned with the preset scanning conditions, and the image file is saved to the specified folder.
- **Scan Batch to Print**
Documents are scanned with the preset scanning conditions, and the scanned image is printed on the specified printer.
- **Scan Batch to Mail**
Documents are scanned with the preset scanning conditions, the e-mail software is started up, and the scanned image is attached to a new e-mail message.
- **Scan 1 Page**
Only one page of the document is scanned.
- **Scan Job**
The scanning conditions and scan mode (Scan Batch to File, Scan Batch to Print, or Scan Batch to Mail) are registered in advance as a job. The scan job can then be performed by selecting the registered job from the drop-down list (①) and pressing  (Scan JOB) on the toolbar (②).

**Note**

The following two jobs are already registered as scan jobs.

- **Color Document**
Document is scanned in 24 bit color, as Simplex 300 dpi and then saved in [My Pictures] in the My Documents folder.
- **Binary Document**
Document is scanned in black and white, as Simplex 200 dpi and then saved in [My Pictures] in the My Documents folder.

- **Scan to Presentation Mode**

This mode is handy when the scanner is used in environments, such as conference halls, where it can be connected to large displays or projectors. CapturePerfect 3.0 is switched to full-screen display, the document is scanned, and the scanned image is displayed at full size on the screen.

**Note**

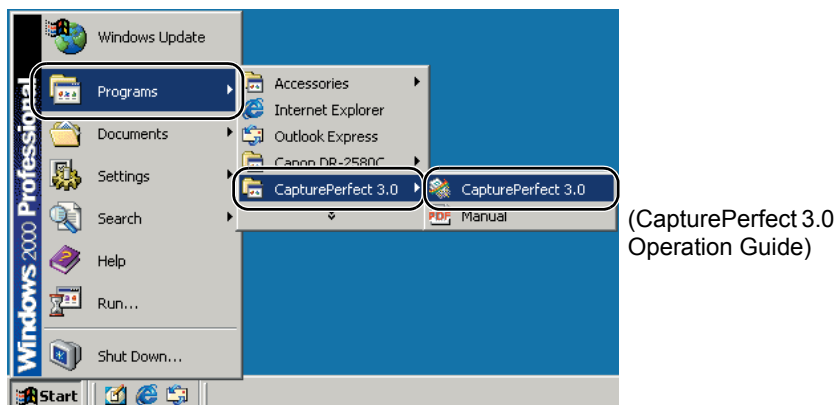

For instructions on how to use CapturePerfect 3.0, see the CapturePerfect 3.0 operation guide and CapturePerfect Help. Be sure to read the CapturePerfect 3.0 operation guide and CapturePerfect Help before you use CapturePerfect 3.0.

CapturePerfect 3.0 Operation Procedure

This section describes how to start up CapturePerfect 3.0, select the scanner, and the procedure up to scanning with Scan Batch to File.

For details, see the CapturePerfect 3.0 Operation Guide and CapturePerfect Help.

1. Click the Windows [Start] button, and then click [Programs] ([All Programs] for Windows XP) → [CapturePerfect 3.0] → [CapturePerfect 3.0].

CapturePerfect 3.0 starts up.

2. Follow the procedure below to select the Canon DR-2580C document scanner as the scanner to be used.
 1. On the [Scan] menu, click [Select Scanner].

2. Select [CANON DR-2580C] → click the [OK] button.

Note

If [CANON DR-2580C] is not displayed in the list of scanners, re-install the ISIS/TWAIN driver. (See “Step 3. Installing the Software” in the Easy Start Guide.)

3. Set the “Default Page Size” and click the [OK] button.

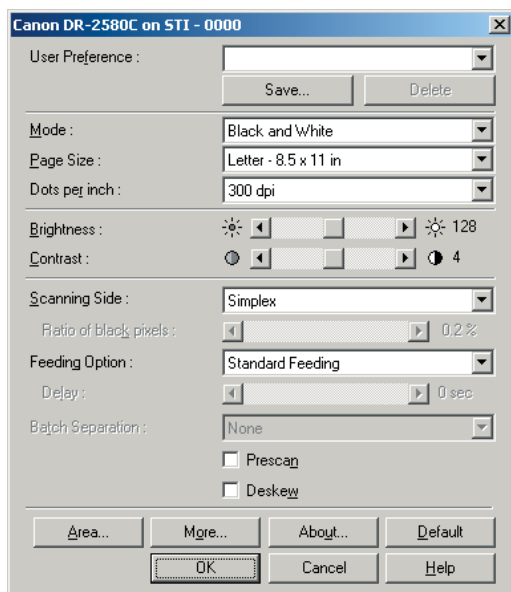

Note

This dialog box is displayed only when you select [CANON DR-2580C] for the first time and you click the [OK] button, or when you click [Settings] on the [Select Scanner].

3. On the [Scan] menu, click [Scanner Setting].

ISIS driver basic setup dialog box opens.

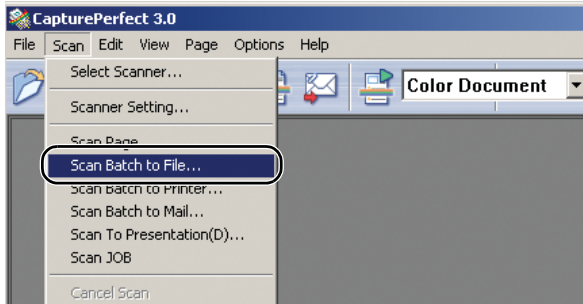

4. Set the scan settings.

For details setting the scanning settings, see “ISIS Driver Settings,” on p. 62, and ISIS/TWAIN Driver Help.

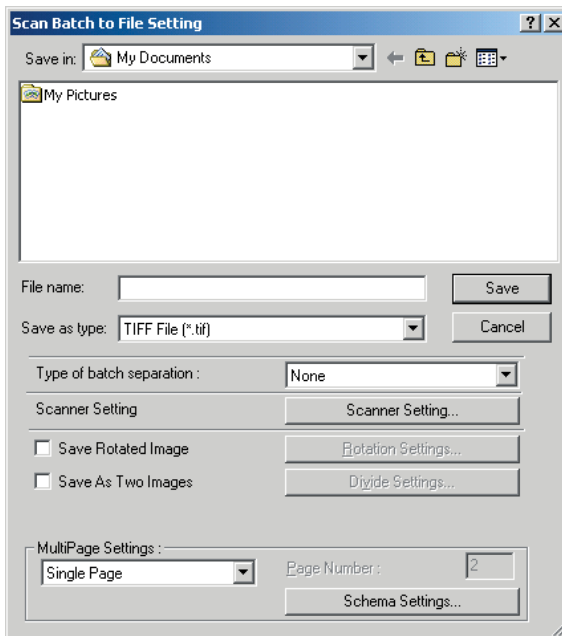

5. Place your document. (See “Placing Documents,” on p. 25.)

6. On the [Scan] menu, select [Scan Batch to File].

The [Scan Batch to File Setting] dialog box opens.

For more details on how to scan documents, see the CapturePerfect 3.0 operation guide and CapturePerfect Help.

7. Specify the file name and the file type for saving the image data, and click [Save] to start scanning.

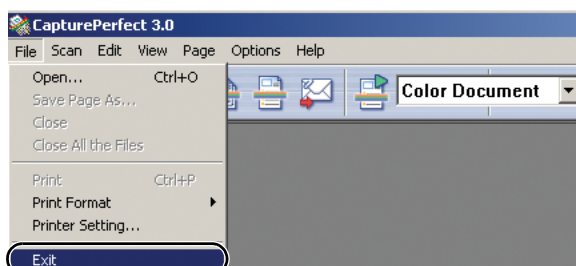

For details on the available settings in the [Scan Batch to File Setting] dialog box, see the CapturePerfect 3.0 operation guide and CapturePerfect Help.

8. When there are no more pages of the document to scan, scanning stops. Scanning resumes or ends according to the “Feeding Option” setting in the scanner setup.
- When “Feeding Option” is set to [Standard Feeding]
The continue dialog box is displayed. Place the next document, and click [Continue scanning] to resume scanning. Or, click [Stop Scanning] to end scanning.

- When “Feeding Option” is set to [Automatic Feeding]
Place the next document. Scanning resumes when the scanner detects the document. Or, click the Job Button (stop) to end scanning.
- When “Feeding Option” is set to [Panel-Feeding]
Place the next document and press the Job Button (start) to resume scanning.
Or, click the Job Button (stop) to end scanning.

9. After scanning is complete, select [Exit] on the [File] menu to quit CapturePerfect 3.0.

Using the Job Function

The Job Function, which is used to assign an arbitrary job to a Job Button on the scanner, allows you to assign a job that is executed when the Job Button is pressed to start scanning. This allows you to start scanning by just pressing a Job Button without starting up an application. The data for the scanned images is automatically processed according to the conditions set with the Job Registration Tool. (See “About Job Function,” on p. 37.)

About Job Function

The Job Function has the following four functions and also functions as a start and stop button used by applications. These functions are used by assigning them to a Job button with the Job Registration Tool. (See “About Job Registration Tool,” on p. 38.)

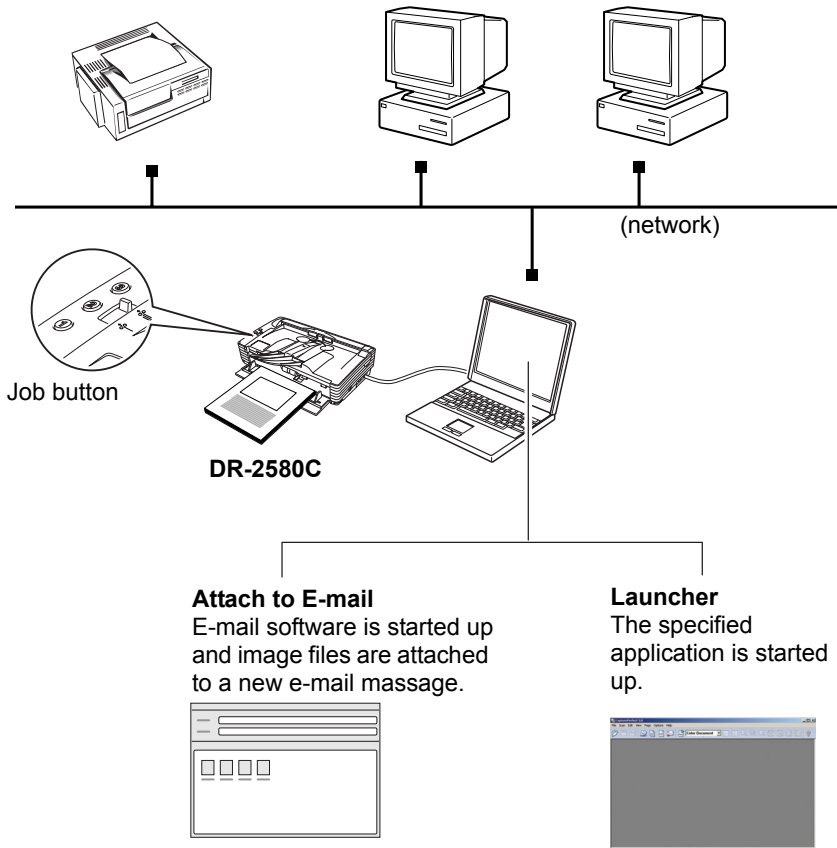

Print

Image files are printed on a specified printer.

Save as file

Image files are saved to a specified folder.

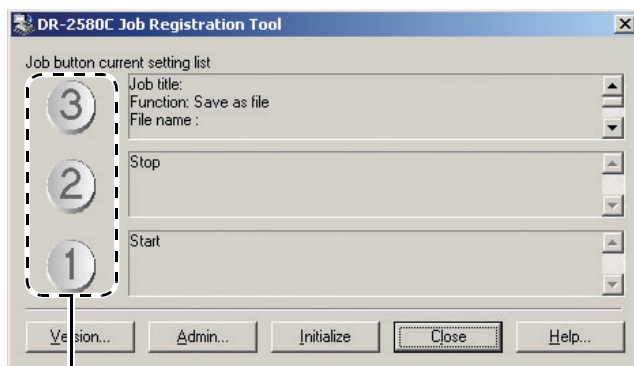

Note

You need to set the Windows event before using the Launcher. (See “About the Launcher,” on p. 40.)

About Job Registration Tool

The Job Registration Tool, which is used to set the Job buttons, is a TWAIN compatible application that is installed together with the ISIS/TWAIN driver.

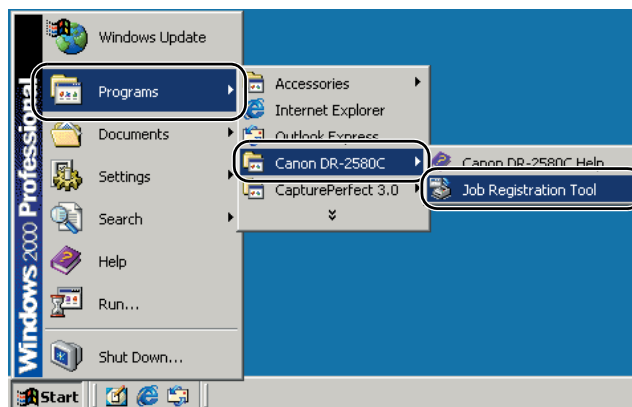

Job button settings

For details on the settings in Job Registration Tool, see “Job Registration Tool Settings,” on p. 66 and Job Registration Tool Help.

Note

- The following jobs are pre-assigned to the Job buttons.
 - ① Start: Scanning starts according to the application settings.
 - ② Stop: Scanning stops.
 - ③ Save as file: Scanned images are saved as PDF files to the My Pictures folder.
- To start up the Job Registration Tool, click the Windows [Start] button, and then click [Programs] ([All Programs] for Windows XP) → [DR-2580C] → [Job Registration Tool].

- Describe the jobs that you register with the Job Registration Tool on the job labels provided and stick them on the scanner.

Executing scanning with the Job Function

1. Place the document. (See “Placing Documents,” on p. 25.)

2. Push the Job button to start a job.

The “Monitor for DR2580C” is displayed and scanning is executed.

-
3. When there are no more document sheets, the image data is transferred according to the specified conditions.

[Sending complete] is displayed on the “Monitor for DR2580C.”

4. Click [Close] to close the “Monitor for DR2580C.”

About the Launcher

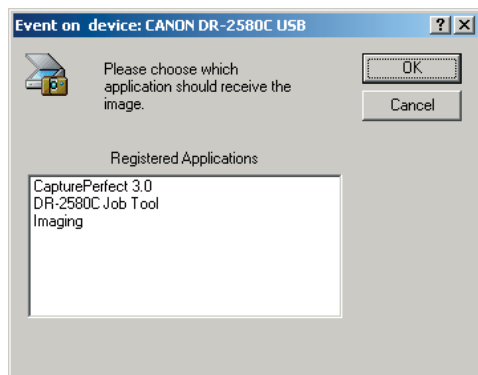

Only applications supported by the Windows event function can be started with the Job Function’s [Launcher]. To use the [Launcher], specify one application in advance to be started according to the event settings.

Note

- Depending on the application, it may not operate normally with the [Launcher].
- In the initial status of the DR-2580C immediately after setup, all the applications the event function supported are enabled. At this point, if no event settings are changed, the following dialog box is displayed when the [Launcher] is executed.

When this dialog box is displayed, you can either select and start an application or click [Cancel] to change the event settings.

Setting the Event Function

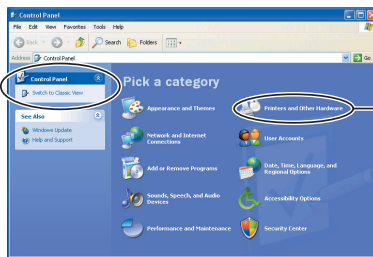

Follow the procedure below to set an event.

1. Use the following procedure to open the [Event settings] dialog box.
 1. Click the [Start] button, and then click [Settings] on the [Start] menu → click [Control Panel]. (For Windows XP, click the [Start] button → click [Control Panel].)

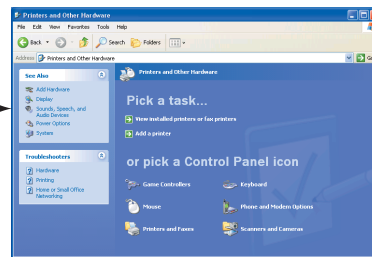

2. For Windows XP, switch the Control Panel to Classic View, or select [Printers and Other Hardware] in the working field.

Control Panel (category view)

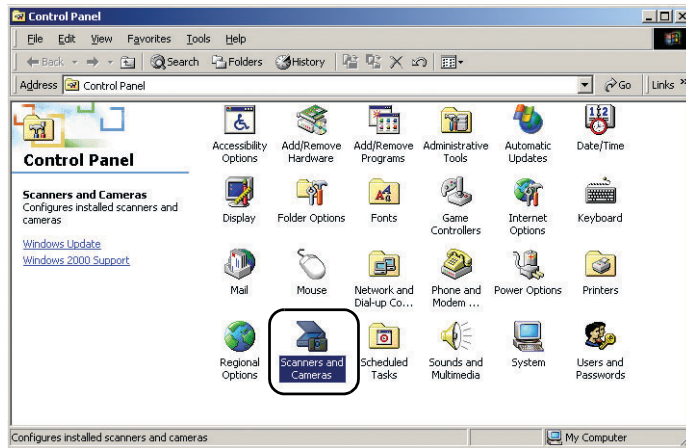

Printers and Other Hardware

Control Panel (classic view)

3. Double-click [Scanners and Cameras].

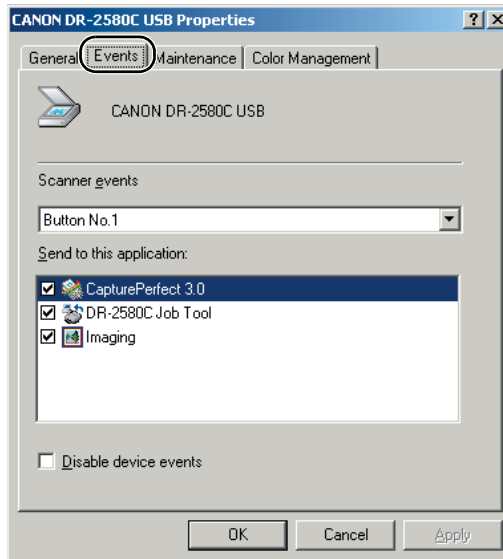

4. Select [CANON DR-2580C USB], and then click [Properties].

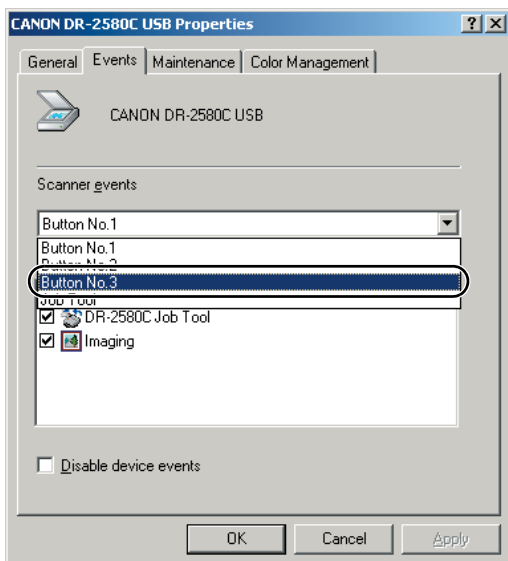

[Canon DR-2580C USB Properties] is displayed.

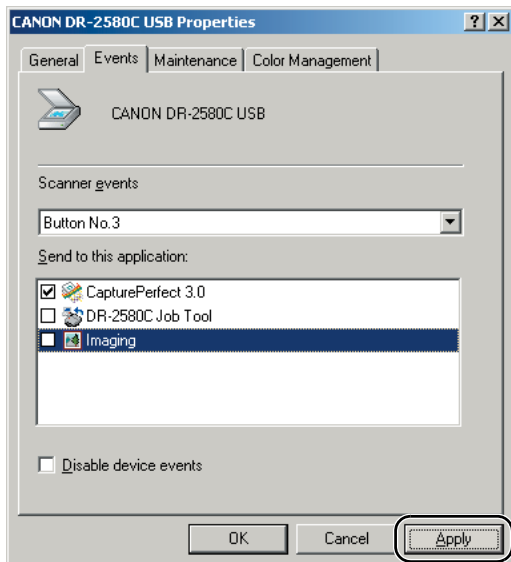

5. Click the [Events] tab.

2. Select the Job Button (Button No.1, Button No.2, or Button No.3) whose settings were changed with the scanner event.

3. In the initial status, all the applications displaying [Send to this application] are checked. Select one application to be started with the [Launcher] and uncheck the checkboxes for the other applications and then click [Apply]. (See p. 40.)

IMPORTANT

You cannot use Job Functions if the [Disable device events] checkbox is checked. Do not check this checkbox.

-
- 4.** Click [OK] to close [CANON DR-2580C USB Properties].
 - 5.** Restart Windows to enable the new settings for the event function.

5. Clearing a Paper Jam

When paper jams occur during scanning, use the following procedure to clear them.

CAUTION

Be careful when removing jammed paper. It is possible to cut your hand on the edge of a sheet of paper.

1. Remove any documents that have been left in the eject tray.
2. Close the document eject tray extension.

IMPORTANT

If document ejection is stopped part way, perform this operation with the document eject tray extension open. Attempting to force the document eject tray extension closed can crease the document.

3. Press on both sides of the back cover to open it.

4. Pressing the OPEN knob from both sides, raise the upper unit.

OPEN Knob

5. Remove the jammed document.

**IMPORTANT**

Be sure to pull the document out carefully, without applying too much force. Should the document tear, be sure to remove any part remaining in the scanner.

6. Close the upper unit slowly.

**IMPORTANT**

Do not force the upper unit to close. Doing so may damage the scanner.

-
7. Be sure that the upper unit is completely closed by pushing on both edges with both hands until you hear a click.

8. Press on both sides of the back cover to close it.

IMPORTANT

Be sure to press on both sides of the upper unit and back cover to ensure that they are securely closed. Feeding errors will occur if only one side is closed.

Note

After removing the jammed paper, check to see if the last page was scanned, and then continue scanning.

6. Other Functions

This scanner also supports the scanning functions described below.

Scanning Folio (Folded Document)	P. 49
Double Feed Detection Function	P. 50
Long Document Mode	P. 50
Flatbed Scanner Unit (Option)	P. 54

Scanning Folio (Folded Document)

The scanner uses a folio scanning method to scan documents that are bigger than LTR/A4 size (maximum A3 size). To do folio scanning, fold the document in half and place it on the scanner. Both sides of the folded document are scanned and combined into a single image.

IMPORTANT

- Attach the document guide adaptors to prevent documents from skewing when doing folio scan. (See p. 21.)
- Use nonseparated document scanning when doing folio scan.
- Firmly set the fold in the document. The fold in the document may cause paper jams or misaligned images.

Note

- Folio scanning is set in the ISIS/TWAIN driver.
- The image on the front of the folded document appears as the left side of the image.
- Combined images can be a maximum of A3 size.
- A seam may appear where the images are combined if the document or the fold in the document is crooked.

Double Feed Detection Function

The scanner is equipped with a [Double Feed Detection] function that automatically detects when two or more documents are fed at the same time (double feed) while doing continuous scanning.

There are two methods for multiple feed detection as shown below, the detection method is selected by the “ISIS/TWAIN driver”.

Detecting Double Feed by Document Length

This detection method is effective when scanning a document on pages that are all the same size. The length of the first page scanned is used as a standard against which the rest of the pages are compared. If any page is 1.96" (50mm) longer or shorter than the first page it is considered a multiple feed and scanning stops.

Detecting Double Feed with Ultrasonic Waves

This detection method is effective when scanning a document on pages that are different sizes. Ultrasonic waves are used to detect pages that are fed at the same time as well as the space between pages. Scanning stops if they are detected.

Note

- Ultrasonic double feed detection works when the documents overlap by 1.96" (50 mm) or more.
- If the documents are stuck together with static electricity, the ultrasonic double feed detection will not correctly detect them as a double feed.

Long Document Mode

Normally the scanner can scan documents up to 13.97" (355 mm) in length, however if you change the settings to the Long Document mode it is possible to scan documents up to a maximum of 39.2" (1,000 mm) in length. To use the Long Document mode, change the scanner's settings to the Long Document mode in scanner properties. Set the paper size in the “ISIS/TWAIN driver” to [Automatic Detection] to allow the scanner to detect documents up to 39.2" (1,000 mm) long and to scan them.

IMPORTANT

Note the following points when using the Long Document mode.

- Documents may be scanned more slowly when the scanner is scanning with automatic size detection in Long Document mode.
- When scanning in the Long Document mode, if the document is placed on the scanner in a skewed position, it may rub against both sides of the feed path and be damaged. Be careful to place the document so it is not skewed.

- When using the Long Document mode, the paper jam detection may react slowly resulting in damage to the document. Be careful to avoid paper jams.
- Be sure to feed paper with the bypass mode when scanning in the Long Document mode.

Long Document Mode Settings

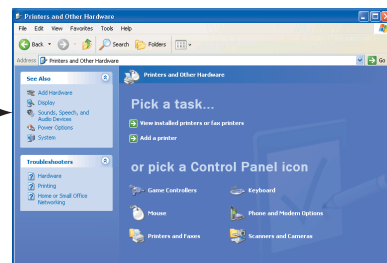

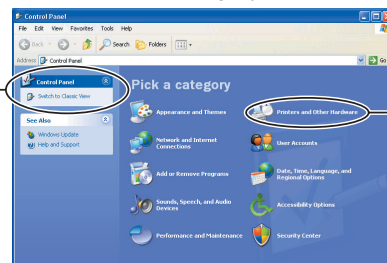

1. Use the following procedure to open the [Event settings] dialog box.
 1. Click the [Start] button, and then click [Settings] on the [Start] menu → click [Control Panel]. (For Windows XP, click the [Start] button → click [Control Panel].)

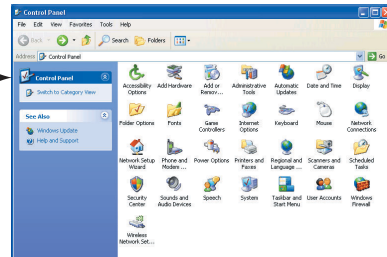

2. For Windows XP, switch the Control Panel to Classic View, or select [Printers and Other Hardware] in the working field.

Control Panel (category view)

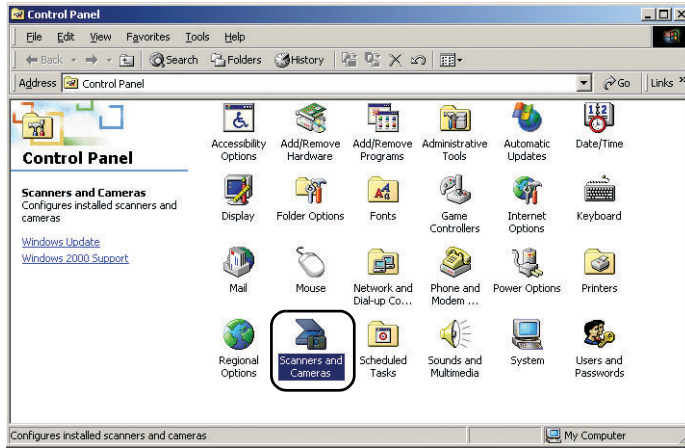

Printers and Other Hardware

Control Panel (classic view)

3. Double-click [Scanners and Cameras].

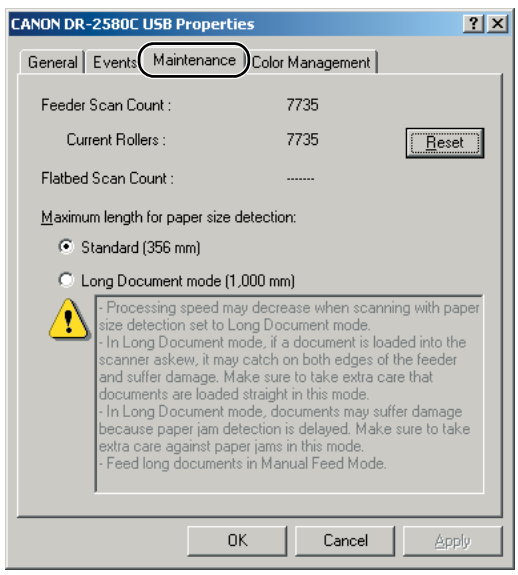

4. Select [CANON DR-2580C USB], and then click [Properties].

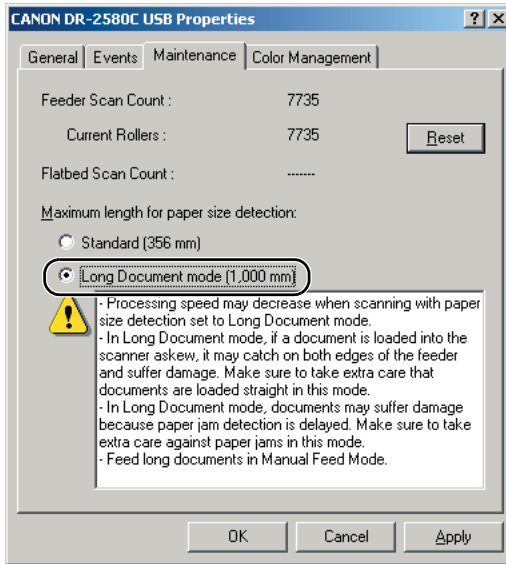

[CANON DR-2580C USB Properties] is displayed.

2. Click the [Maintenance] tab.

3. Click the [Long Document mode (1,000 mm)] check box.

4. Click [Apply] to change the scanner's settings.
5. Click [OK] to close [Scanners and Cameras Properties].
6. Turn the scanner OFF and then ON again.

Flatbed Scanner Unit (Option)

Optional flatbed scanner units are available for the DR-2580C. The flatbed scanner unit can be used to scan thick documents, books and other documents that cannot pass through the feeder without having to change the scanner or applications.

Flatbed scanner unit (connected to the DR-2580C)

Note

The flatbed scanner unit cannot operate in a stand-alone configuration. Contact your local authorized Canon dealer or service representative for more detailed information.

7. Scanning Hints

This section describes helpful hints for setting up and using your scanner. Refer to these hints when you set up the ISIS/TWAIN driver. For more details on items not described in this section, see “Software Settings,” on p. 61.

Scanning Double-sided Documents

- **I want to scan a double-sided document.**
Set Scanning Side to [Duplex].
See “ISIS Driver Settings ⑦,” on p. 62, and “TWAIN Driver Settings ⑦,” on p. 64.

Scanning Non-standard Size Documents

- **I want to scan non-standard size documents**
When a non-standard size document is scanned with a standard size specified, a black margin around the scanned image. If you want to scan nonstandard size documents, set “Page Size” to [Auto-detection]. The size of the document is automatically detected.
See “ISIS Driver Settings ③,” on p. 62, and “TWAIN Driver Settings ③,” on p. 64.
- **I want to scan documents on extra-long paper.**
Set the scanner to Long Document mode and set the “Page Size” to [Auto-detection]. Documents on paper up to 1,000 mm long can be scanned.
See “Long Document Mode,” on p. 50.
See “ISIS Driver Settings ③,” on p. 62, and “TWAIN Driver Settings ③,” on p. 64.
- **I want to register non-standard size documents**
A non-standard document size can be registered as a Custom Paper Size.
See “ISIS Driver Settings ⑫,” on p. 62, and “TWAIN Driver Settings ⑫,” on p. 64.
- **I want to scan only part of a document**
The scan area can be specified before scanning. Note, however, that the scan area cannot be specified when “Page Size” is set to [Auto-detection].
See “ISIS Driver Settings ⑬,” on p. 62, and “TWAIN Driver Settings ⑬,” on p. 64.

Scanning Multiple Documents

- **I want to divide a document that cannot be placed all at once into multiple stacks and scan them as a single file**

Set the “Feeding Option” in the Scanner Settings to [Automatic Feeding].

When the scanner detects a document, scanning starts automatically, and you can continue scanning batches until your job is complete.

When “Feeding Option” is set to [Panel-Feeding], scanning does not start until you place your document and press Scan button. This is handy when you need to align the edges of the document after it has been placed.

See “ISIS Driver Settings ⑧,” on p. 62, and “TWAIN Driver Settings ⑧,” on p. 64.

- **I want to divide up scanned images by individual document stacks to save as separate files**

Set the “Feeding Option” to [Automatic Feeding] or [Panel-Feeding], and set “Batch Separation” to [Auto]. (ISIS driver only)

See “ISIS Driver Settings ⑧,” on p. 62, and “ISIS Driver Settings ⑨,” on p. 62.

- **I want to scan a document one sheet at a time**

Set the “Feeding Option” to [Automatic Feeding] or [Panel-Feeding] to scan one sheet at a time. Scanning is interrupted after one page of the document is scanned.

If the “Feeding Option” is set to [Automatic Feeding] and the next document is loaded, the scanner starts scanning when it detects the next document.

If the “Feeding Option” is set to [Panel-Feeding] and the next document is loaded, the scanner starts scanning when the Scan button is pressed.

See “ISIS Driver Settings ⑧,” on p. 62, and “TWAIN Driver Settings ⑧,” on p. 64.

- **I want scanning to stop if two or more pages of the document are fed together.**

Enable the double feed detection function. The scanner stops feeding the document if it detects that two pages of the document have been fed at the same time.

See “ISIS Driver Settings ⑮,” on p. 62, and “TWAIN Driver Settings ⑭,” on p. 64.

Scanning Documents Containing Blank Sheets

- **I want to skip blank sheets contained in a document stack.**
Set “Scanning Side” to [Skip blank page]. [Double-sided scanning] is not performed, and blank pages are skipped.
See “ISIS Driver Settings ⑦,” on p. 62, and “TWAIN Driver Settings ⑦,” on p. 64.
- **Blank sheets are not skipped even if [Skip blank page] is set.**
Set a higher [Ratio of black pixels] value (adjust the slider towards the right).
If a low [Ratio of black pixels] value is set, blank sheets are sometimes not skipped due to the background color or dirt on the document.
- **Documents full of text are skipped as blank sheets.**
Set a lower [Ratio of black pixels] value (adjust the slider towards the left).
If a high [Ratio of black pixels] value is set, even documents full of text are sometimes skipped as blank sheets.

When a blank sheet is not skipped, adjust the slider to the right.
When a text document is skipped, adjust the slider to the left.

Adjusting Scanned Image

- **I want to clearly scan dark background images**

Set “Mode” to [Advanced Text Enhancement]. The background of the document is removed to enhance the text.

See “ISIS Driver Settings ②,” on p. 62, and “TWAIN Driver Settings ②,” on p. 64.

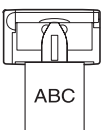

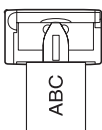

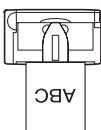

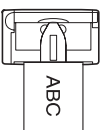

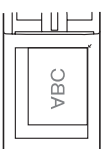

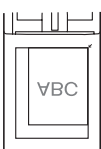

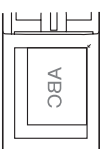

- **I want to scan the document with its black and white areas reversed**

Set the Scanning Modes to [Black and white], [Error diffusion], or [Advanced Text Enhancement] and check the [Reverse Image] checkbox. Black and white areas are reversed in the scanned images. (TWAIN Driver only)

See “TWAIN Driver Settings ②,” on p. 64, and “TWAIN Driver Settings ⑩,” on p. 64.

- **I want to rotate the scanned image**

Specify the amount of rotation (0°, 90°, 180°, 270°) in [Document Orientation]. The image is rotated as noted below depending on how the document is placed.

Feeder, document: face up				
Flatbed, document: face down				
Document Orientation (clockwise)	0°	90°	180°	270°
Output image				

See “ISIS Driver Settings ⑮,” on p. 62, and “TWAIN Driver Settings ⑮,” on p. 64.

- **I want to rotate the image to coincide with the text on the document**

Check the [Text Orientation Recognition] checkbox. The scanner detects the orientation of the text in the document and rotates the scanned image 90° at a time.

See “ISIS Driver Settings ⑰,” on p. 62, and “TWAIN Driver Settings ⑰,” on p. 64.

- **I want to skip specific colors**

Specify the color to skip during scanning in [Color drop-out].

See “ISIS Driver Settings ⑳,” on p. 62, and “TWAIN Driver Settings ⑳,” on p. 64.

- **I want to enhance specific colors (red, blue, green)**

Select the color to enhance (red, blue or green) at [Color drop-out].

See “ISIS Driver Settings ㉑,” on p. 62, and “TWAIN Driver Settings ㉑,” on p. 64.

- **I want to enhance image contours**

Adjust the “Edge emphasis” setting.

See “ISIS Driver Settings ㉒,” on p. 62, and “TWAIN Driver Settings ㉒,” on p. 64.

- **I want to delete black borders around images**

Check the [Border Removal] checkbox.

See “ISIS Driver Settings ㉓,” on p. 62, and “TWAIN Driver Settings ㉓,” on p. 64.

- **I want to delete the black spots that are left when scanning documents that have had holes put in them to be stored in a binder**

Check the [Punch Hole Removal] checkbox.

See “ISIS Driver Settings ㉔,” on p. 62, and “TWAIN Driver Settings ㉔,” on p. 64.

Prescan Function

- **I want to preview the image before I scan it**

Check the [Prescan] checkbox.

When scanning starts, a single page of the document is scanned so you can check the image in the preview window displayed on the scanning panel.

See “ISIS Driver Settings ⑩,” on p. 62, and “TWAIN Driver Settings ⑨,” on p. 64.

Registering Settings

- **I want to use preset scanning conditions again**

Assign a name to the scanning conditions and register them as a user preference. If you select the name of an already registered user preference, the conditions you set overwrite the settings of the selected user preference.

See “ISIS Driver Settings ①,” on p. 62, and “TWAIN Driver Settings ①,” on p. 64.

Flatbed Scanning (Option)

- **I want to scan on the flatbed**

Set the “Scanning Side” setting to [Flatbed] or [Auto]. When Scanning Side is set to [Auto], the document on the [Flatbed] is scanned when there is no longer a document in the document feed opening.

If the flatbed unit is not connected, [Flatbed] and [Auto] do not appear in the “Scanning Side” settings.

See “ISIS Driver Settings ⑦,” on p. 62, and “TWAIN Driver Settings ⑦,” on p. 64.

8. Software Settings

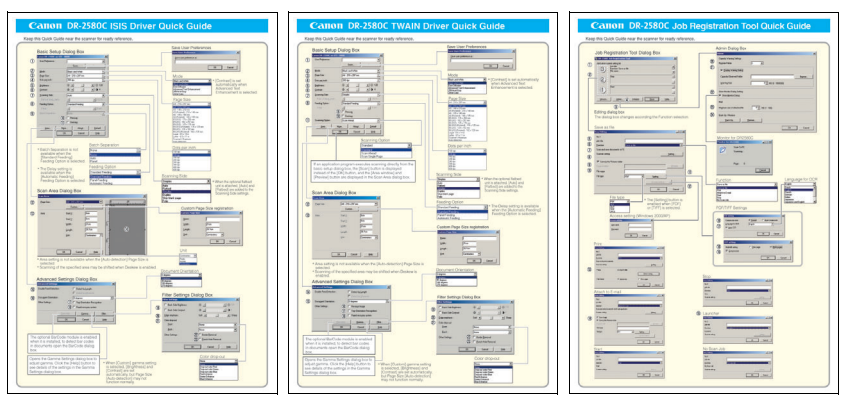

This section describes the setting items when setting the ISIS driver, TWAIN driver, and Job Registration Tool. For a more detailed description, read the Help files for each item.

ISIS Driver Settings.....P. 62
TWAIN Driver Settings.....P. 64
Job Registration Tool Settings.....P. 66

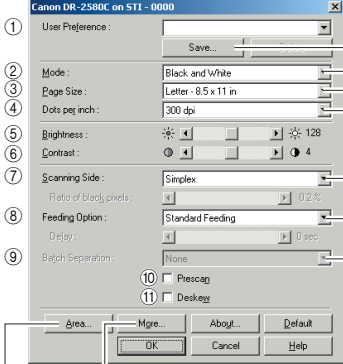

Note

- The ISIS Driver Settings section explains the dialog boxes displayed in CapturePerfect 3.0. The basic setup dialog box may not be displayed in some ISIS compatible applications. In this case, the advanced settings dialog box, which includes some of the functions from the basic setup dialog box, is displayed.
- The TWAIN Driver Settings section explains the dialog boxes that are displayed for “Scanner Settings” in the Job Registration Tool dialog boxes.
- For TWAIN compatible applications that execute scanning directly from the basic setup dialog box, a [Scan] button is displayed instead of an [OK] button in the basic setup dialog box and, a [Preview] button and area window are displayed in the advanced settings dialog box.
- The PDF file that contains this User’s Guide, which is on the setup disc, has a “Quick Guide” that has the same information as this section. Print it out and keep it near the scanner where it can be easily used.

ISIS Driver Settings

Basic Setup Dialog Box

- ① User Preference
- ② Mode
- ③ Page Size
- ④ Dots per inch
- ⑤ Brightness
- ⑥ Contrast
- ⑦ Scanning Side
- ⑧ Feeding Option
- ⑨ Batch Separation

- * Batch Separation is not available when the [Standard Feeding] Feeding Option is selected.
- * The Delay setting is available when the [Automatic Feeding] Feeding Option is selected.

Save User Preferences

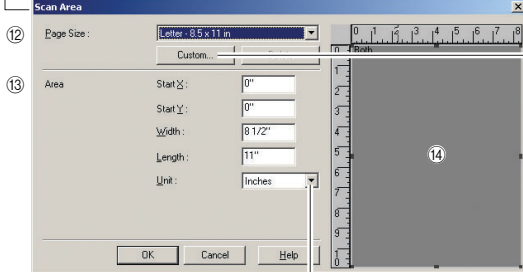

* [Contrast] is set automatically when Advanced Text Enhancement is selected.

* When the optional flatbed unit is attached, [Auto] and [Flatbed] are added to the Scanning Side settings.

Scan Area Dialog Box

- ⑫ Page Size
- ⑬ Area

- * Area setting is not available when the [Auto-detection] Page Size is selected.
- * Scanning of the specified area may be shifted when Deskew is enabled.

Custom Page Size registration

Advanced Settings Dialog Box

- ⑮ Double Feed Detection
- ⑯ Document Orientation
- ⑰ BarCode
- ⑱ Gamma

The optional BarCode module is enabled when it is installed, to detect bar codes in documents open the BarCode dialog box.

Opens the Gamma Settings dialog box to adjust gamma. Click the [Help] button to see details of the settings in the Gamma Settings dialog box.

* When [Custom] gamma setting is selected, [Brightness] and [Contrast] are set automatically, but Page Size [Auto-detection] may not function normally.

Document Orientation

Filter Settings Dialog Box

- ⑲ Back Side Brightness
- ⑳ Back Side Contrast
- ㉑ Edge emphasis

Basic Setup Dialog Box

- ① **User Preference**
Name and save your settings.
 - ☞ Names can consist of up to 32 characters.
- ② **Mode**
Selects the scanning mode.
- ③ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Selecting [Auto-detection] causes automatic page size detection when scanning.
- ④ **Dots per inch**
Selects scanning resolution.
- ⑤ **Brightness**
Adjusts brightness of scanned images.
- ⑥ **Contrast**
Adjusts the contrast of scanned images.
 - ☞ [Contrast] is set automatically when the Advanced Text Enhancement mode is selected.
- ⑦ **Scanning Side**
Specifies the side of the document to scan.
 - ☞ When [Skip blank page] is selected, images are skipped if they are determined blank based on the [Ratio of black pixels] value.
 - ☞ When [Folio] is selected, both sides of a document are scanned, and the images displayed are combined into one image. For details on Folio, refer to "Scanning Folio (Folded Document)" (See p. 49.) in the user's guide.
 - ☞ [Ratio of black pixels] specifies the ratio of black areas (0 to 20%) when skipping blank pages.
- ⑧ **Feeding Option**
Selects the document feeding method.
 - ☞ [Standard Feeding] scans loaded documents after starting scanning from the application program.
 - ☞ With [Panel-Feeding], scanning is started by pressing the Job Button assigned as the Start button after the document is placed.
 - ☞ [Automatic Feeding] starts scanning whenever the scanner detects a loaded document.
- ⑨ **Batch Separation**
This setting is enabled when the [Panel Feeding] or [Automatic Feeding] Feeding Option is selected. Documents can be scanned as separate batches.
- ⑩ **Prescan**
When scanning starts, a page of the document is scanned and its image is displayed in the Prescan window.
- ⑪ **Deskew**
When a document page feeds at a slant, the scanned image is straightened.

Scan Area Dialog Box

- ⑫ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Click [Custom] to register a non-standard document size as a custom page size.
- ⑬ **Area**
Specifies the area to be scanned.
 - ☞ These settings are disabled when [Autodetection] is selected for the Page Size.
- ⑭ **Area Window**
The appearance of this window indicates the current Page Size setting.
 - ☞ The specified scan area can be adjusted by dragging the mouse.

Advanced Settings Dialog Box

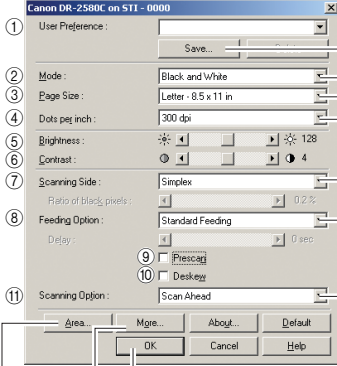

- ⑮ **Double Feed Detection**
The scanner stops feeding when it detects that two or more pages of the document have been fed at the same time.
- ⑯ **Document Orientation**
Specify clockwise rotation of scanned images according to the orientation of documents to be scanned.
- ⑰ **Text Orientation Recognition**
Detects the text orientation in scanned images and rotates the images in 90° increments to normalize text orientation.
- ⑱ **Rapid recovery system**
Select this function to prevent error reporting to the application program when feeding is interrupted due to a paper jam or similar error while scanning. After fixing the cause of the interruption, scanning can be quickly resumed with standard operations.

Filter Settings Dialog Box

- ⑲ **Brightness/contrast of back side**
The scanner checks the difference in density between the front and back sides of the document and adjusts the contrast and the brightness for the back side.
- ⑳ **Edge emphasis**
Enhances contours in scanned images.
- ㉑ **Color drop-out**
Enabled for all scanning modes except [24 bit Color], this function selects skipping (drop-out) or enhancement of red, green or blue when scanning documents.
- ㉒ **Border Removal**
Removes the black border that may be created around scanned images.
- ㉓ **Punch Hole Removal**
Removes the black holes created in scanned images when scanned documents have holes punched for binding.

TWAIN Driver Settings

Basic Setup Dialog Box

If an application program executes scanning directly from the basic setup dialog box, the [Scan] button is displayed instead of the [OK] button, and the [Area window] and [Preview] button are displayed in the Scan Area dialog box.

Scan Area Dialog Box

Advanced Settings Dialog Box

The optional BarCode module is enabled when it is installed, to detect bar codes in documents open the BarCode dialog box.

Opens the Gamma Settings dialog box to adjust gamma. Click the [Help] button to see details of the settings in the Gamma Settings dialog box.

* When [Custom] gamma setting is selected, [Brightness] and [Contrast] are set automatically, but Page Size [Auto-detection] may not function normally.

Save User Preferences

* [Contrast] is set automatically when Advanced Text Enhancement is selected.

Scanning Side

* When the optional flatbed unit is attached, [Auto] and [Flatbed] are added to the Scanning Side settings.

Feeding Option

* The Delay setting is available when the [Automatic Feeding] Feeding Option is selected.

Custom Page Size registration

Document Orientation

Filter Settings Dialog Box

Color drop-out

Basic Setup Dialog Box

- ① **User Preference**
Name and save your settings.
 - ☞ Names can consist of up to 32 characters.
- ② **Mode**
Selects the scanning mode.
- ③ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Selecting [Auto-detection] causes automatic page size detection when scanning.
- ④ **Dots per inch**
Selects scanning resolution.
- ⑤ **Brightness**
Adjusts brightness of scanned images.
- ⑥ **Contrast**
Adjusts the contrast of scanned images.
 - ☞ [Contrast] is set automatically when the Advanced Text Enhancement mode is selected.
- ⑦ **Scanning Side**
Specifies the side of the document to scan.
 - ☞ When [Skip blank page] is selected, images are skipped if they are determined blank based on the [Ratio of black pixels] value.
 - ☞ When [Folio] is selected, both sides of a document are scanned, and the images displayed are combined into one image. For details on Folio, refer to "Scanning Folio (Folded Document)" (See p. 49.) in the user's guide.
 - ☞ [Ratio of black pixels] specifies the ratio of black areas (0 to 20%) when skipping blank pages.
- ⑧ **Feeding Option**
Selects the document feeding method.
 - ☞ [Standard Feeding] scans loaded documents after starting scanning from the application program.
 - ☞ [Panel-Feeding] scans loaded documents after pressing the scanner's scan button.
 - ☞ [Automatic Feeding] starts scanning whenever the scanner detects a loaded document.
- ⑨ **Prescan**
When scanning starts, a page of the document is scanned and its image is displayed in the Prescan window.
- ⑩ **Deskew**
When a document page feeds at a slant, the scanned image is straightened.
- ⑪ **Scanning Option**
Specifies operation during scanning.
 - ☞ [Standard]: after one page has been scanned and ejected, the next page is scanned.
 - ☞ [Scan Ahead]: scans document pages continuously.
 - ☞ [Scan Single Page]: Scanning Side is set and fixed at [Simplex], and only one page is scanned.

Scan Area Dialog Box

- ⑫ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Click [Custom] to register a nonstandard document size as a custom page size.
- ⑬ **Area**
Specifies the area to be scanned.
 - ☞ These settings are disabled when [Autodetection] is selected for the Page Size.

Advanced Settings Dialog Box

- ⑭ **Double Feed Detection**
The scanner stops feeding when it detects that two or more pages of the document have been fed at the same time.
- ⑮ **Document Orientation**
Specify clockwise rotation of scanned images according to the orientation of documents to be scanned.
- ⑯ **Reverse Image**
When the [Black and White], [Error Diffusion] or [Advanced Text Enhancement] mode is selected, black and white are reversed in the scanned image.
- ⑰ **Text Orientation Recognition**
Detects the text orientation in scanned images and rotates the images in 90° increments to normalize text orientation.
- ⑱ **Rapid recovery system**
Select this function to prevent error reporting to the application program when feeding is interrupted due to a paper jam or similar error while scanning. After fixing the cause of the interruption, scanning can be quickly resumed with standard operations.

Filter Settings Dialog Box

- ⑲ **Brightness/contrast of back side**
The scanner checks the difference in density between the front and back sides of the document and adjusts the contrast and the brightness for the back side.
- ⑳ **Edge emphasis**
Enhances contours in scanned images.
- ㉑ **Color drop-out**
Enabled for all scanning modes except [24 bit Color], this function selects skipping (drop-out) or enhancement of red, green or blue when scanning documents.
- ㉒ **Border Removal**
Removes the black border that may be created around scanned images.
- ㉓ **Punch Hole Removal**
Removes the black holes created in scanned images when scanned documents have holes punched for binding.

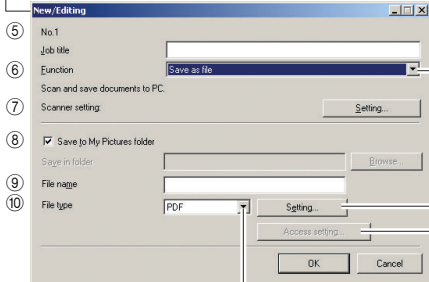

Job Registration Tool Settings

Job Registration Tool Dialog Box

New/Editing dialog box

The dialog box changes according the Function selection.
Save as file

* The [Setting] button is enabled when [PDF] or [TIFF] is selected.

Attach to E-mail

Start

Admin Dialog Box

Monitor for DR2580C

Function

Language for OCR

PDF/TIFF Settings

Stop

Launcher

No Scan Job

Job Registration Tool Dialog Box

- ① **List of Job Button settings**
Shows the settings registered for Job Buttons.
- ② **Job Button (1-3)**
Correspond to the Job Buttons on the scanner. The Editing dialog box opens when you click these buttons.
- ③ **[Admin] button**
Opens the Admin dialog box.
- ④ **[Initialize] button**
Returns the Job Buttons to their factory settings.

Editing Dialog Box

- ⑤ **Job title**
Enter the title of the job to display in the list of Job button settings.
☞ You can enter up to 29 single-byte alphanumeric or kana characters.
- ⑥ **Function**
Selects the function assigned to the Scan button.
☞ The contents of the Editing dialog box are determined by the selected function.
- ⑦ **Scanner setting**
Opens the TWAIN driver's basic setting dialog box to configure the scanner.
- ⑧ **Save to My Pictures folder**
Saves scanned images in the My Pictures folder in My Documents.
☞ When this check box is not selected, you can specify the destination folder for saving images.
- ⑨ **File name**
Specifies the file name.
☞ Image file names are created by appending a time stamp to the specified file name.
- ⑩ **File type**
Selects the file format for saved images.
☞ The [Setting] button is enabled when [PDF] or [TIFF] is selected.
- ⑪ **[Setting] button**
This button is enabled when the PDF or TIFF file type is selected, and opens the PDF or TIFF Setting dialog box.
☞ The PDF setting dialog box provides [Compression] and [OCR] settings.
☞ The TIFF setting dialog box provides [Multi-tiff setting] and [Compression] settings.
- ⑫ **[Access setting] button**
This button is available when using Windows 2000/XP, and opens the Access setting dialog box.
☞ Enter the correct User name and Password to obtain access to a shared network folder.
- ⑬ **Printer**
Shows the default printer. Printer settings can be changed by clicking the [Printer setting] button.
- ⑭ **Save Image**
Select this check box to save images scanned using the [Scan To Mail] Function.

- ⑮ **Launcher**
Starts applications set with the Windows event function. See the user's guide for detailed information. (See p. 40.)

PDF/TIFF Settings

- ⑯ **Compression rate**
Selects [Normal] or [High Compression] rate.
☞ [High Compression] reduces the file's size, but also reduces the image quality slightly.
☞ [High Compression] is useful for grayscale and color images.
- ⑰ **Language for OCR/Apply OCR**
Recognizes printed text in a document as characters, and adds text data to the PDF file.
☞ When the [Apply OCR] check box is selected, recognized text data is saved where the printed text is located in the PDF file.
☞ When OCR is applied, Deskew is enabled, regardless of the configured settings for the TWAIN driver.
- ⑱ **Multi-tiff setting**
Selects the saving method for multiple page images.
☞ [One page] creates one file for one page with the number of TIFF files corresponding to the number of pages.
☞ [Multi pages] saves the images for all of the pages as one file.
- ⑲ **Compression**
Compresses image files before saving them.
☞ Black and white images are compressed as CCITT Group 4 images, while grayscale and color images are compressed as JPEG images.

Admin Dialog Box

- ⑳ **Capacity Warning Settings**
Specifies the folder for saved image files, and the capacity of that folder, in advance.
☞ After specifying the folder and starting to scan, a warning message is displayed when the specified capacity is reached while scanning.
- ㉑ **Register Folder/Display Warning Dialog**
The [Capacity Observed Folder] and [Warning Size] items are enabled by specifying a [Register Folder] (number) and selecting the [Display Warning Dialog] check box.
☞ When the capacity warning is displayed, follow the displayed instructions to continue scanning.
- ㉒ **Show Monitor Dialog**
The Monitor for DR2580C dialog box appears when the Scan button is pressed, and the scan progress is displayed.
- ㉓ **Maximum size of attached file**
Specifies a maximum size for image files to be attached to e-mails. This Quick Guide describes settings for the Job Registration Tool. Click the Help button for details.
- ㉔ **Job Backup/Restore**
Backs up and restores registered jobs.
☞ Backup files can be restored on another DR-2580C document scanner.

Uninstalling the ISIS/TWAIN Driver/ Job Registration Tool	96
Uninstalling CapturePerfect 3.0	98
5. Specifications	100
Specifications	100
External Dimensions	103

1. Regular Maintenance

Clean the scanner on a regular basis as described below to maintain peak scanning quality.

CAUTION

- **When cleaning the scanner or inside of the scanner, turn OFF the power switch and unplug the Power Cord from the outlet.**
- **Do not use excessive force when removing or attaching the rollers. Doing so may damage them.**
- **Never use paint thinner, alcohol, or other organic solvents to clean the scanner. Such solvents can damage or discolor the exterior of the scanner. They also create a risk of fire or electrical shock.**

Cleaning the Scanner

To clean the exterior of the scanner, dampen a cloth with water or a mild detergent, wring the cloth out thoroughly, and then wipe the dirt away. Then use a dry, soft cloth to wipe away any moisture.

Cleaning the feed path

Dust or paper particles in the document feed opening or inside the scanner can cause lines in scanned images. Use a blower to periodically clean dust and paper particles from the document feed opening and the inside of the scanner. After finishing a large scanning job, you should turn off the scanner and then clean out any paper particles.

Cleaning the Sensor Glass, Shading Boards, and the Rollers

If scanned images have extraneous marks, or if the scanned documents are dirty, then the sensor glass or rollers inside the scanner may be dirty. Clean them periodically.

1. Pressing the OPEN knob from both sides, raise the upper unit.

Note

- The location of the sensor glass and various rollers are shown below.
- The scanner has white, 0.08" (2 mm) wide shading boards located at the front and back of the upper and lower sensor glasses. The scanner uses the shading boards to determine white standards during scanning. Dirty shading boards can cause stripes in scanned images. Periodically clean them to ensure good scanning results.

-
2. Use a blower to keep the interior of the scanner free of dust and paper particles.
 3. Use a clean dry cloth to wipe dirt off the sensor glass.
Wipe both the top and bottom sensor glasses.

⚠ CAUTION
Do not use spray type cleaners to clean the scanner. Precision mechanisms, such as the light source, may get wet which will cause a malfunction.

👉 IMPORTANT
Scratches on the sensor glass may cause marks on the images and could cause feeding errors. If there are scratches on the sensor glass, contact your local authorized Canon dealer or service representative.

4. Use a commercially available cotton swab to clean off any dirt from the shading boards at the front and back of the sensor glasses.

👉 IMPORTANT
Wipe both the top and bottom shading boards.

5. Wipe the rollers with a firmly wrung cloth moistened with water.

👉 IMPORTANT

- Do not use detergent to clean the rollers, since any detergent on the rollers could cause a feeding error.
- If you cannot freely rotate the rollers, do not force them to rotate. Just clean the part that you can see. Forcing the rollers to rotate may cause a feeding error.

6. Remove the roller unit and retard roller. (See “Removing and Attaching the Feed Roller,” on p. 79.)

7. Wipe the removed rollers with a firmly wrung cloth moistened with water.

8. Attach the rollers that were removed. (See “Removing and Attaching the Feed Roller,” on p. 79.)

9. Close the upper unit slowly.

IMPORTANT

Do not force the upper unit to close. Doing so may damage the scanner.

10. Be sure that the upper unit is completely closed by pushing on both edges with both hands until you hear a click.

2. Removing and Attaching the Rollers

Follow the relevant procedure to remove and attach the roller unit and retard roller when you clean or replace them.

IMPORTANT

Feed rollers are consumable parts. When the rollers start to wear out, paper jams and misfeeds may occur more often. When this happens, buy an exchange roller kit, and replace the roller unit and the retard roller.

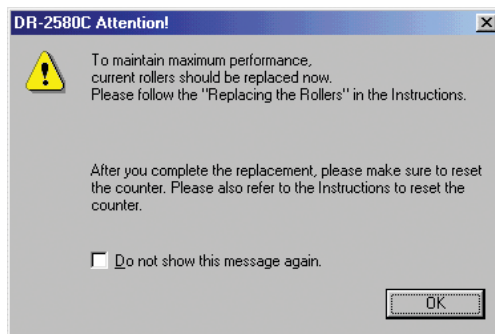

CAUTION

Do not use excessive force when removing or attaching the rollers. Doing so may damage them.

Roller Replacement Cycle

When the rollers being used have fed more than 100,000 pages, a roller replacement message is displayed on the computer. Buy a roller replacement kit and change the roller unit and the retard roller.

IMPORTANT

- If misfeeds happen often, check the rollers for wear, and replace them if necessary before the message is displayed.
- Be sure to reset the counter after replacing the rollers. (See “Resetting the Counter,” on p. 75.)
- Contact your local authorized Canon dealer or service representative for information about the exchange roller kit (roller unit and retard roller).

Resetting the Counter

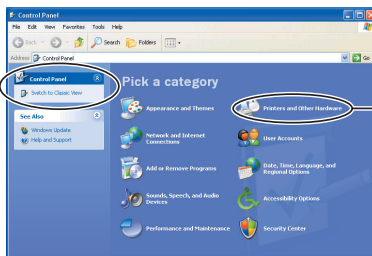

After replacing the feed rollers, open the [Counter setup] dialog box and reset the counter.

1. Follow the procedure below to open the [Counter setup] dialog box.
 1. Click the [Start] button, and then click [Settings] on the [Start] menu → click [Control Panel]. (For Windows XP, click the [Start] button → click [Control Panel].)

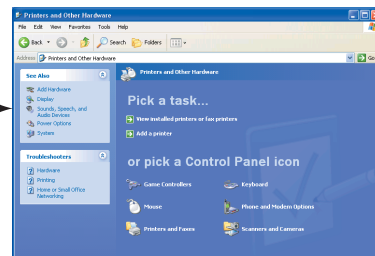

2. For Windows XP, switch the Control Panel to Classic View, or select [Printers and Other Hardware] in the working field.

Control Panel (category view)

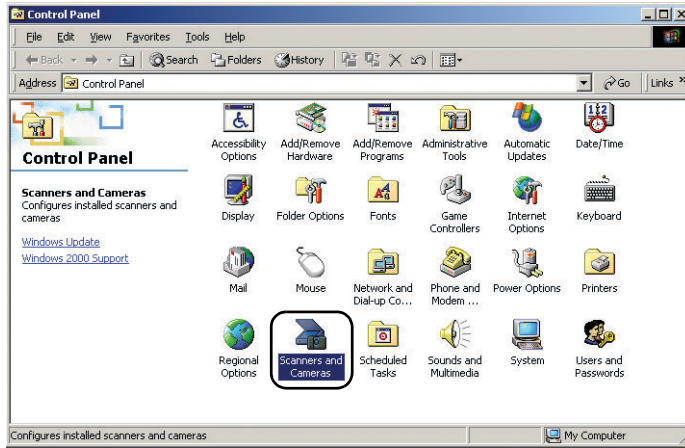

Printers and Other Hardware

Control Panel (classic view)

3. Double-click [Scanners and Cameras].

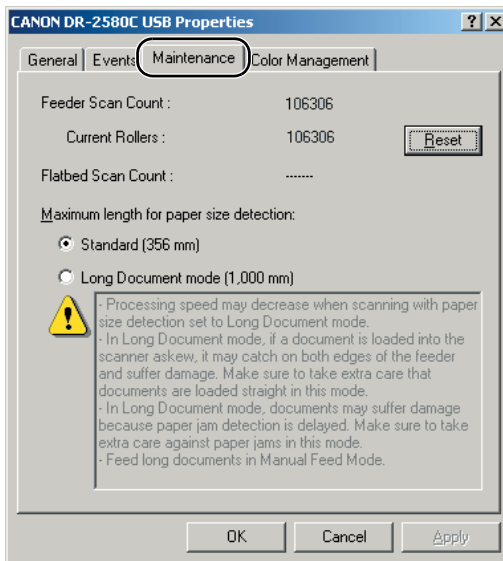

4. Select [CANON DR-2580C USB], and then click [Properties].

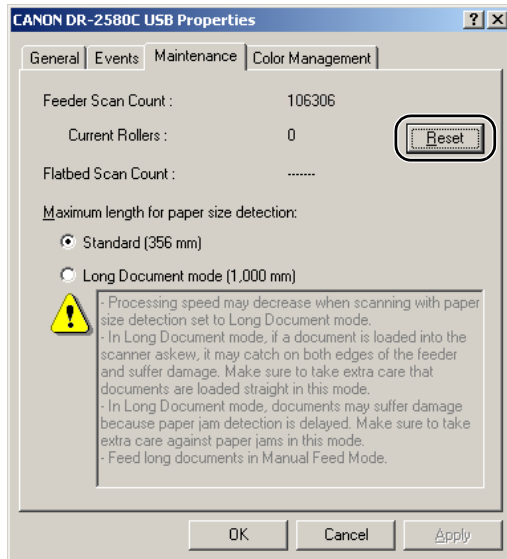

[Canon DR-2580C USB Properties] is displayed.

2. Click the [Maintenance] tab.

3. Click the [Reset] button, and then make sure that the counter for the roller being used is set to 0.

Removing and Attaching the Feed Roller

Follow the procedure below to remove and attach the roller unit for cleaning or replacement.

Note

When attaching the roller unit during installation, operate the roller fastening lever according to the removal procedure and then attach the roller unit.

CAUTION

Do not use excessive force when removing or attaching the rollers. Doing so may damage them.

Removing the Roller Unit

1. Pressing the OPEN knob from both sides, raise the upper unit.

2. Move the roller lock lever towards you.

3. Supporting the roller unit with your hand, slide the roller lock lever to the right.

4. Lower the roller unit.

5. First detach the right side of the roller unit (①), and then remove the roller unit (②).

Attaching the Roller Unit

1. Set the roller unit onto the scanner's shaft.

2. Insert the protrusion of the roller unit into the groove in the scanner, and then lift the roller unit.

3. Slide the roller lock lever to the left.

-
- 4.** Push the roller lock lever towards the back of the scanner to lock the roller unit in place.

- 5.** Close the upper unit slowly.

IMPORTANT

Do not force the upper unit to close. Doing so may damage the scanner.

- 6.** Be sure that the upper unit is completely closed by pushing on both edges with both hands until you hear a click.

Removing and Attaching the Retard Roller

Follow the procedure below to remove and attach the retard roller for cleaning or replacement.

Note

When attaching the retard roller during installation, operate the roller fastening lever according to the removal procedure and then attach the roller unit.

CAUTION

Do not use excessive force when removing or attaching the rollers. Doing so may damage them.

Removing the Retard Roller

1. Pressing the OPEN knob from both sides, raise the upper unit.

2. Remove the roller cover.

-
- 3.** Move the roller lock lever upward (①), and then slide it to the right (②).

- 4.** Shift the retard roller to the right to remove it.

Attaching the Retard Roller

- 1.** Position the retard roller so the notch in the roller is facing the scanner's shaft.

2. Slide the roller lock lever to the left, and insert it into the retard roller hole.

3. Push the roller lock lever towards the back of the scanner to lock the retard roller in place.

4. Attach the roller cover.

5. Close the upper unit slowly.

IMPORTANT

Do not force the upper unit to close. Doing so may damage the scanner.

6. Be sure that the upper unit is completely closed by pushing on both edges with both hands until you hear a click.

3. Troubleshooting

This section describes the possible problems that might occur during use of the scanner and how to solve them.

- The Scanner Does Not Turn ONP. 87**
- The Scanner Is Not RecognizedP. 87**
- Scanning Is Not Performed.....P. 88**
- Slow Scanning Speed.....P. 88**
- Documents Do Not Feed Properly.....P. 89**
- Saved Image Files Do Not Open.....P. 90**
- Scanning Results Are Not as Expected.....P. 91**
- The Flatbed Scanner (Option) Does Not Work.....P. 92**

If, after consulting this section, you still cannot resolve the problem, contact your local authorized Canon dealer or your service representative.

The Scanner Does Not Turn ON

Check the following if the scanner does not turn on:

- Is the power cord connected correctly?
- Is the power cord inserted into the power outlet?

For details on connecting the power cord, see “Step 4. Connecting the Scanner to Your PC,” in the Easy Start Guide.

The Scanner Is Not Recognized

The following are possible causes of the PC failing to recognize the scanner. Check each possible cause.

Problem	The scanner is not correctly connected.
Solution	Make sure that the scanner and the computer are correctly connected with the USB cable. (See “Step 4. Connecting the Scanner to Your PC,” in the Easy Start Guide.)
Problem	The scanner power is switched OFF.
Solution	Make sure that the scanner is switched ON. If the scanner is OFF, turn the scanner ON. (See “Step 4. Connecting the Scanner to Your PC,” in the Easy Start Guide.)

Problem	The scanner does not support your USB interface.
Solution	This product is not guaranteed to operate with all types of USB interfaces. Contact your local authorized Canon dealer or service representative for more information. (See p. 14.)
Problem	The scanner does not support the USB cable.
Solution	Use the USB cable provided with the scanner.
Problem	The USB hub is not compatible with the scanner.
Solution	Remove the USB hub.

Scanning Is Not Performed

Check the following if the scanner does not scan an image even though the scanning operation is performed:

- Has the application software been installed correctly? Has the application software been set up correctly?
- Is there a problem in the PC system?
- Is the flatbed scanner unit (option) correctly attached

IMPORTANT

- If documents are not scanned normally even if the scanner setup is OK, a probable cause is that the scanner driver or application software is not running correctly. Re-install the scanner driver or application software.
- When system errors result in the scanner not functioning at all, turn OFF the scanner and wait at least ten seconds before turning it ON again. If the error continues to occur, restart the computer.
- When scanning continues, make sure that the last document scanned was scanned correctly.
- When using the flatbed scanner unit (option), make sure that the flatbed scanner unit is correctly attached to the DR-2580C before scanning. Scanning cannot be done if the flatbed scanner unit is not correctly attached to the DR-2580C.

Slow Scanning Speed

The following problems might cause the scanning speed to be slow.

Problem	Other applications are running in the background on your PC.
Solution	Quit all other applications that are running.

Problem	Resident applications, such as anti-virus software, are draining memory resources.
Solution	Quit all resident applications.

Problem	Temporary files cannot be created in the TEMP folder, as there is not enough free space on the hard disk.
Solution	Delete unwanted files on the hard disk to increase free space on the hard disk.

Problem	The USB port you are using does not support Hi-Speed USB 2.0.
Solution	Scanning speeds are lower if your computer's standard USB interface is not compatible with Hi-Speed USB 2.0. (See p. 14.) Use a computer that is equipped with USB that is compatible with Hi-Speed USB 2.0 as standard.

Problem	The USB cable does not support Hi-Speed USB 2.0.
Solution	Use the USB cable provided with the scanner.

Problem	The USB hub does not support Hi-Speed USB 2.0.
Solution	Remove the USB hub.

Documents Do Not Feed Properly

The following are possible causes of a document failing to feed properly. Check each possible cause.

Problem	Static electricity, etc., is causing the pages of the document to stick together, and they cannot be separated correctly by the scanner.
Solution	Before you place your document, thoroughly fan the stack of papers. (See "Placing Documents," on p. 25.)

Problem	Attempting to scan a document of a size, thickness, or weight that the scanner cannot scan.
Solution	Check the size, thickness, and weight of the document. For precautions concerning documents, see "Documents," on p. 18.

Problem	The rollers inside the scanner are dirty or worn.
Solution	Refer to p. 71 and clean the rollers. If the rollers are worn, then they need to be replaced. Contact your local authorized Canon dealer or service representative to purchase a roller replacement kit.

IMPORTANT

The retard roller and roller unit are consumable components. You need to replace the retard roller and roller unit when cleaning does not appear to improve them. Contact your local authorized Canon dealer and buy a roller replacement kit and then replace the retard roller and the roller unit.

Saved Image Files Do Not Open

When image files saved by CapturePerfect 3.0 cannot be opened by other applications, the probable causes are as follows.

Symptoms **A multi-page TIFF file saved in CapturePerfect 3.0 cannot be opened by other applications.**

Problem The application you are using to open the TIFF file does not support multi-page TIFF files.

Solution Open the file with an application that supports multi-page TIFF files.

Symptoms **A TIFF file saved in CapturePerfect 3.0 cannot be opened by other applications.**

Problem If the TIFF file saved in CapturePerfect 3.0 has been compressed, the application you are using to open the TIFF file does not support the compression type that was used to save the file in CapturePerfect 3.0.

Solution Set the compression type for the image file to [None] and save the file again in CapturePerfect 3.0.

Scanning Results Are Not as Expected

If there is a problem with the scanning result (e.g., the scanned image is not clear, or the image is striped or dirty), the probable causes are incorrect ISIS/TWAIN driver settings or a problem with the scanning unit inside the scanner. Scanning results can also become skewed if the ISIS/TWAIN driver has not been installed correctly, or the application in use does not support ISIS/TWAIN driver functions.

Symptoms **The scanned image is too dark (or faint).**

Problem The [Brightness] setting is not set to an appropriate value.

Solution If the image is dark, set a higher [Brightness] setting, or if the image is faint, set a lower [Brightness] setting.
(See “Software Settings,” on p. 61.)

Symptoms **Text or images on the rear side of your document appear in the scanned image.**

Problem The [Brightness] setting is too low, or the paper is too thin.

Solution Set a higher [Brightness] setting. If the paper is too thin, make a copy of the documents and then scan the copy.

Symptoms **Double-sided scanning is not possible.**

Problem [Scanning Side] is set to [Simplex].

Solution Set [Scanning Side] to [Double-sided].

Symptoms **A black margin appears around the scanned document.**

Problem A document smaller than the preset paper size has been scanned. Or, the loaded document has shifted out of position.

Solution Set [Paper size] to [Auto-detection]. Or, set [Border Removal] to on.

Symptoms **The scanned image is skewed.**

Problem The document has been fed at an angle. (skew)

Solution Use the document guide adapter to prevent document skew, and set [Deskew] to on. (See “Software Settings,” on p. 61.)

Symptoms Lines, smudges, or dirt appear on the scanned image.

Problem The scanning glass or rollers inside the scanner are dirty.

Solution Clean the scanning glass and rollers.
If lines still appear on the image even after cleaning the scanning glass and rollers, the scanning glass inside the scanner may be scratched. Contact your local authorized Canon dealer or service representative. (See p. 70.)

Symptoms The scanned image is abnormal for certain documents.

Problem Functions such as [Auto-detection], [Deskew], or [Border Removal] were used when scanning documents containing text or photos up to their edges. (The scanner cannot accurately process the edges of documents.)

Solution Turn off functions such as [Auto-detection], [Deskew], or [Border Removal] when scanning documents containing text or photos up to their edges. (See “Software Settings,” on p. 61.)

Symptoms The scanned image is abnormal in some applications.

Problem A function not supported by the application was used.

Solution Some applications do not support functions such as auto-detection of the paper size. Scanning documents with an application such as this will result in an abnormal scanned image. Try scanning with auto-detection of the paper size set to “off.”

The Flatbed Scanner (Option) Does Not Work

Operational failure of the optional flatbed scanner unit can be caused by any of the reasons described below. Try the solution according to the problem.

Problem The ISIS/TWAIN scanner is set to something other than Flatbed.

Solution Set the ISIS/TWAIN driver to [Flatbed]. Refer to Help for the ISIS/TWAIN Driver for information about the ISIS/TWAIN Driver settings.

Problem The interface connector is not connected.

Solution Check the connections between the DR-2580C and the flatbed scanner unit.

Problem The DR-2580C is not installed correctly.

Solution Check the document size, thickness, and paper type. Remove the DR-2580C scanner and then reinstall it correctly.

Problem The hook is not correctly attached to the DR-2580C.

Solution Remove the DR-2580C scanner and then reinstall it correctly.

Problem The DR-2580C scanner was installed without removing the transport locks.

Solution Remove the DR-2580C scanner and remove the transport locks.

For information about removing the flatbed scanner unit, see the manual that comes with it.

4. Uninstalling Software

If the ISIS/TWAIN driver, “Job Registration Tool,” and “CapturePerfect 3.0” are not operating normally, follow the procedure below to uninstall them.

Then, re-install the software from the DR-2580C setup disc. (See “Step 3. Installing the Software,” in the Easy Start Guide.)

IMPORTANT

Be sure to log on as an administrator when using Windows 2000 Professional or Windows XP.

1. Click the [Start] button → click [Settings] → [Control Panel].

Note

For Windows XP, click the [Start] button → click [Control Panel].

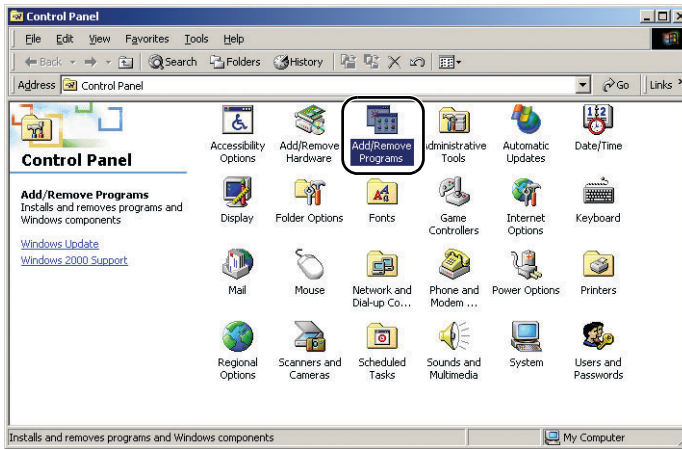

The [Control Panel] window appears.

2. Double-click the [Add/Remove Programs].

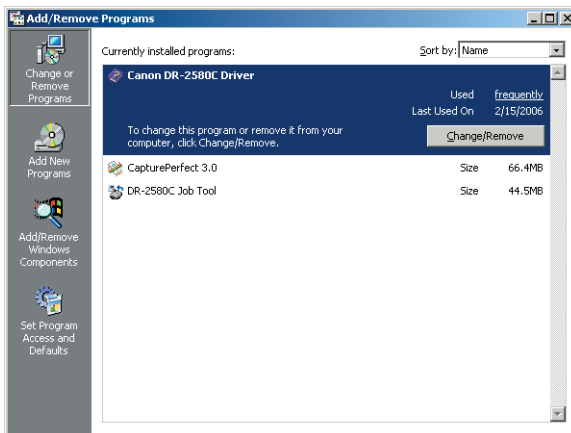

Note

If you are using Windows XP, double-click the [Add or Remove Programs].

The [Add/Remove Programs Properties] dialog box appears.

Note

For Windows XP, the [Add or Remove Programs] dialog box appears.

- From the list in the dialog box, select the application you want to delete → click [Change/Remove].

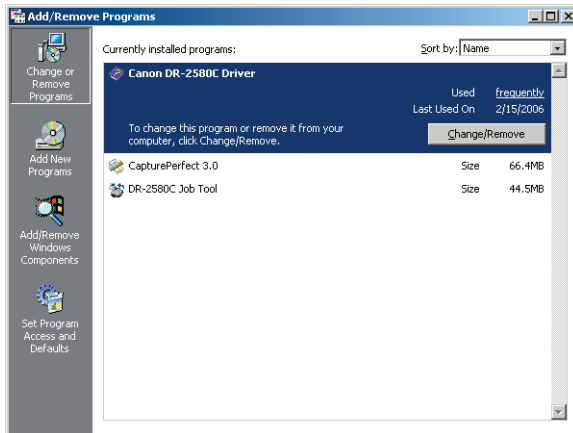

For more information on uninstalling each application, see the following:

See “Uninstalling the ISIS/TWAIN Driver/Job Registration Tool,” on p. 96.

See “Uninstalling CapturePerfect 3.0,” on p. 98.

Uninstalling the ISIS/TWAIN Driver/Job Registration Tool

1. From the Programs list in the dialog box, select [Canon DR-2580C Scanner Driver] (or [DR-2580C Job Tool]) → click the [Change/Remove] button.

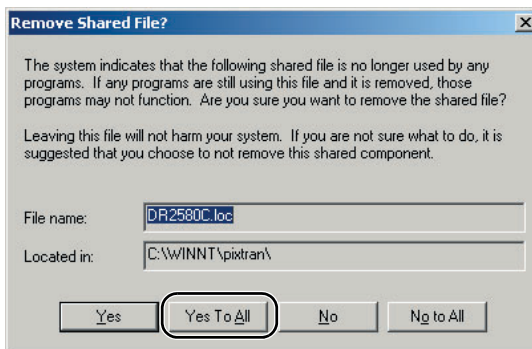

2. The [Confirm File Deletion] screen appears. Click the [Yes] button.

The [Remove Shared File ?] dialog box appears.

3. Click the [Yes To All] button.

A confirmation message appears.

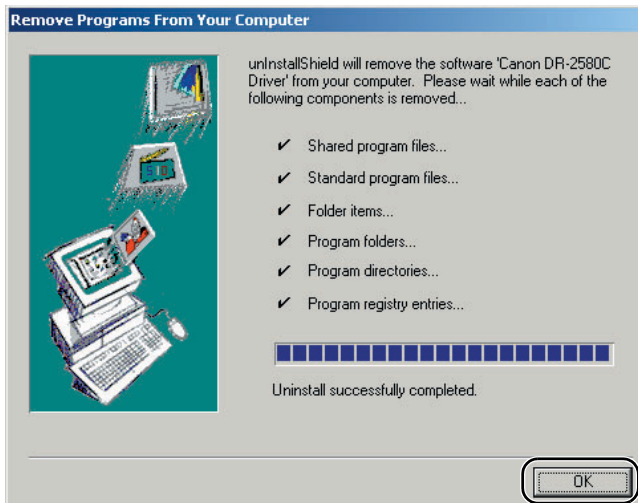

4. Click the [Yes] button to start the uninstallation.

Note

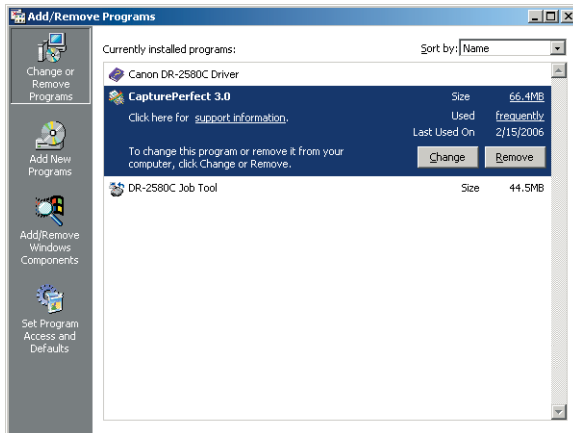

All deleted shared files can be reinstalled by installing the software again.

5. After uninstall is complete, click the [OK] button to exit the uninstaller.

Uninstalling CapturePerfect 3.0

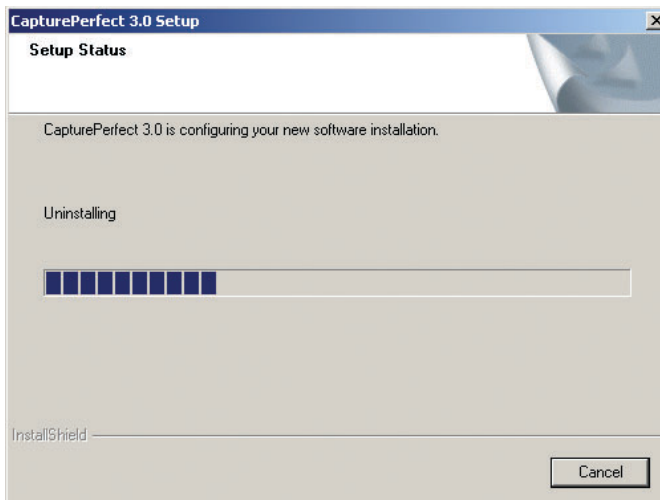

1. Select [CapturePerfect 3.0] from the list in the dialog box → click the [Remove] button.

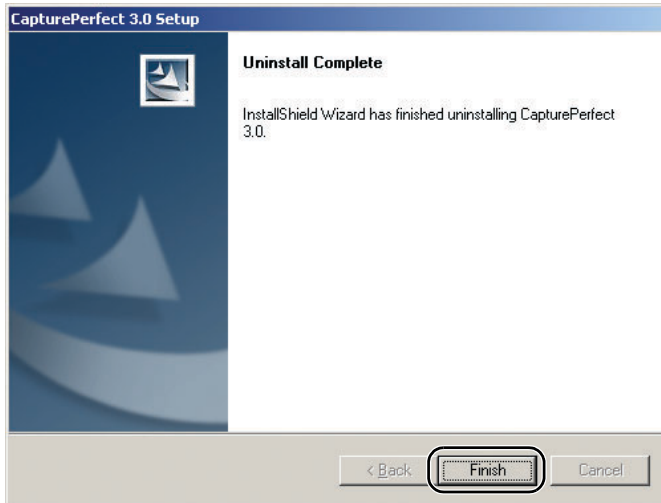

2. The file delete confirmation screen appears. Click the [Yes] button.

Uninstallation starts.

-
3. After uninstallation is complete, click the [Finish] button to exit the uninstaller.

5. Specifications

Specifications

Scanner

Type	Desktop sheetfed scanner	
Scanning Document Specifications		
Width:	2.08" to 8.50" (53 mm to 216 mm)	
Length:	2.75" to 13.9" (70 mm to 355.5 mm)	
Weight: Using the U-Turn Path		
(separated documents)	14 to 32 lb bond (0.0024" to 0.0059")	52 to 128 g/m ² (0.06 mm to 0.15 mm)
(nonseparated documents)	11 to 40 lb bond (0.0020" to 0.0079")	42 to 157 g/m ² (0.05 mm to 0.2 mm)
Weight: Using the Straight Path		
(separated documents)	11 to 40 lb bond (0.0020" to 0.0079")	42 to 157 g/m ² (0.05 mm to 0.2 mm)
(nonseparated documents)	11 to 40 lb bond (0.0020" to 0.0079")	42 to 157 g/m ² (0.05 mm to 0.2 mm)
Business cards are supported (excluding embossed cards).		
Size:	2.12" × 3.37" (53.9 mm × 85.5 mm)	
Thickness:	0.03" ± 0.003" (0.76 ± 0.08 mm)	
Document Feeding Method	Automatic	
Scanning Method	Contact image sensor	
Light Source	LED	
Scanning Side	Simplex/Duplex/flatbed (option)	
Scanning Modes	Black and white, Advanced text enhancement, Error diffusion, 256-level grayscale, 24 bit color	
Scanning Resolution (Primary Scan Lines × Secondary Scan Lines)	100 × 100 dpi, 150 × 150 dpi, 200 × 200 dpi 240 × 240 dpi, 300 × 300 dpi, 400 × 400 dpi 600 × 600 dpi	
Scanning Speed	LTR/A4	
Black and White	Simplex	
	200 × 200 dpi	25 pages/minute
	300 × 300 dpi	25 pages/minute
	600 × 600 dpi	6 pages/minute
	Duplex	
	200 × 200 dpi	50 images/minute
	300 × 300 dpi	50 images/minute
	600 × 600 dpi	12 images/minute

256-level Gray	<p>Simplex</p> <p>200 × 200 dpi 25 pages/minute 300 × 300 dpi 25 pages/minute 600 × 600 dpi 6 pages/minute</p> <p>Duplex</p> <p>200 × 200 dpi 50 images/minute 300 × 300 dpi 50 images/minute 600 × 600 dpi 12 images/minute</p>
24-bit Color	<p>Simplex</p> <p>200 × 200 dpi 13 pages/minute 300 × 300 dpi 8 pages/minute 600 × 600 dpi 2 pages/minute</p> <p>Duplex</p> <p>200 × 200 dpi 26 images/minute 300 × 300 dpi 16 images/minute 600 × 600 dpi 4 images/minute</p>
Amount of paper that can be stacked in automatic feeder	5 mm stack, maximum (50 sheets of 20 lb bond (80 g/m ²))
Interface	Hi-Speed USB 2.0
Other Functions	Blank page skip, job function, folio scan
Dimensions (with trays close)	3.2" × 11.9" × 6.7" (W × D × H) 81 mm × 302 mm × 171 mm (W × D × H)
Dimensions (with trays open)	5.4" × 11.9" × 10.5" (W × D × H) 136 mm × 302 mm × 267 mm (W × D × H)
Weight	Approximately 4.2 lb (1.9 kg) 12.6 lb (5.7 kg) with flatbed scanner unit
Power Supply	DC16 V 1.4 A
Power Consumption	Maximum power: 19 W 23.4 W (with flatbed scanner unit) Low power mode: 4 W Power SW OFF: 0.5 W
Noise	Not more than 66 dB
Operating Environment	Temperature: 10°C to 32.5°C (50°F to 90.5°F) Humidity: 20% to 80% RH

AC Adaptor

Model	MG1-4315
Input	AC 100-240 V 50/60 Hz 0.65-0.34 A
Output	DC16 V 1.8 A
Weight	Approximately 0.7 lb (0.3 kg) (including Power Cord)

Replacement Parts

Roller replacement kit (product code: 0106B002)

Kit to replace the feed rollers (roller unit and retard roller).

- Refer to “Removing and Attaching the Feed Roller,” on p. 79 for information about replacing the rollers.
- Contact your local authorized Canon dealer or service representative for detailed information about the replacement parts.

Options

Flatbed scanner unit (Product code: 0106B004)

Flatbed scanner unit that is used by connecting it to the DR-2580C. (See p. 54.)

Flatbed scanner unit HS (Product code: 0106B003)

Flatbed scanner unit HS that is used by connecting it to the DR-2580C. (See p. 54.)

Bar code module (product code: 1922B001)

Additional software to allow the ISIS/TWAIN driver to recognize bar codes.

- Contact your local authorized Canon dealer or service representative for detailed information about the options.

Specifications are subject to change without notice.

Canon DR-2580C ISIS Driver Quick Guide

Keep this Quick Guide near the scanner for ready reference.

Basic Setup Dialog Box

- ① **User Preference**
Name and save your settings.
 - ☞ Names can consist of up to 32 characters.
- ② **Mode**
Selects the scanning mode.
- ③ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Selecting [Auto-detection] causes automatic page size detection when scanning.
- ④ **Dots per inch**
Selects scanning resolution.
- ⑤ **Brightness**
Adjusts brightness of scanned images.
- ⑥ **Contrast**
Adjusts contrast of scanned images.
 - ☞ [Contrast] is set automatically when the Advanced Text Enhancement mode is selected.
- ⑦ **Scanning Side**
Specifies the side of the document to scan.
 - ☞ When [Skip blank page] is selected, images are skipped if they are determined blank based on the [Ratio of black pixels] value.
 - ☞ When [Folio] is selected, both sides of a document are scanned, and the images displayed are combined into one image. For details on Folio, refer to "Scanning Folio (Folded Document)" (see P.49.) in the user's guide.
 - ☞ [Ratio of black pixels] specifies the ratio of black areas (0 to 20%) when skipping blank pages.
- ⑧ **Feeding Option**
Selects the document feeding method.
 - ☞ [Standard Feeding] scans loaded documents after starting scanning from the application program.
 - ☞ With [Panel-Feeding], scanning is started by pressing the Job Button assigned as the Start button after the document is placed.
 - ☞ [Automatic Feeding] starts scanning whenever the scanner detects a loaded document.
- ⑨ **Batch Separation**
This setting is enabled when the [Panel-Feeding] or [Automatic Feeding] Feeding Option is selected. Documents can be scanned as separate batches.
- ⑩ **Prescan**
When scanning starts, a page of the document is scanned and its image is displayed in the Prescan window.
- ⑪ **Deskew**
When a document page feeds at a slant, the scanned image is straightened.

Scan Area Dialog Box

- ⑫ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Click [Custom] to register a non-standard document size as a custom page size.
- ⑬ **Area**
Specifies the area to be scanned.
 - ☞ These settings are disabled when [Auto-detection] is selected for the Page Size.
- ⑭ **Area Window**
The appearance of this window indicates the current Page Size setting.
 - ☞ The specified scan area can be adjusted by dragging the mouse.

Advanced Settings Dialog Box

- ⑮ **Double Feed Detection**
The scanner stops feeding when it detects that two or more pages of the document have been fed at the same time.
- ⑯ **Document Orientation**
Specify clockwise rotation of scanned images according to the orientation of documents to be scanned.
- ⑰ **Text Orientation Recognition**
Detects the text orientation in scanned images and rotates the images in 90° increments to normalize text orientation.
- ⑱ **Rapid recovery system**
Select this function to prevent error reporting to the application program when feeding is interrupted due to a paper jam or similar error while scanning. After fixing the cause of the interruption, scanning can be quickly resumed with standard operations.

Filter Settings Dialog Box

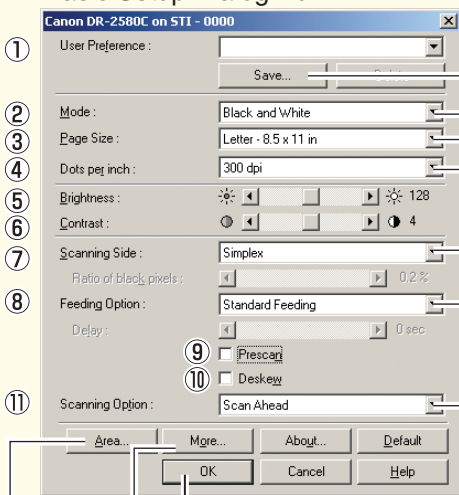

- ⑲ **Brightness/contrast of back side**
The scanner checks the difference in density between the front and back sides of the document and adjusts the contrast and the brightness for the back side.
- ⑳ **Edge emphasis**
Enhances contours in scanned images.
- ㉑ **Color drop-out**
Enabled for all scanning modes except [24 bit Color], this function selects skipping (drop-out) or enhancement of red, green or blue when scanning documents.
- ㉒ **Border Removal**
Removes the black border that may be created around scanned images.
- ㉓ **Punch Hole Removal**
Removes the black holes created in scanned images when scanned documents have holes punched for binding.

This Quick Guide describes the dialog boxes displayed by CapturePerfect. Depending on your application program, the basic setup dialog box may not be displayed. In this case, the Advanced Settings dialog box, which includes some of the functions in the basic setup dialog box, is displayed. Click the Help button for details.

Canon DR-2580C TWAIN Driver Quick Guide

Keep this Quick Guide near the scanner for ready reference.

When scanning starts, a page of the document is scanned and its image is displayed in the Prescan window.
- ⑩ **Deskew**
When a document page feeds at a slant, the scanned image is straightened.
- ⑪ **Scanning Option**
Specifies operation during scanning.
 - ☞ [Standard]:
After one page has been scanned and ejected, the next page is scanned.
 - ☞ [Scan Ahead]:
Scans document pages continuously.
 - ☞ [Scan Single Page]:
Scanning Side is set and fixed at [Simplex], and only one page is scanned.

Scan Area Dialog Box

- ⑫ **Page Size**
Selects the size of the pages to be scanned.
 - ☞ Click [Custom] to register a non-standard document size as a custom page size.
- ⑬ **Area**
Specifies the area to be scanned.
 - ☞ These settings are disabled when [Auto-detection] is selected for the Page Size.

Advanced Settings Dialog Box

- ⑭ **Double Feed Detection**
The scanner stops feeding when it detects that two or more pages of the document have been fed at the same time.
- ⑮ **Document Orientation**
Specify clockwise rotation of scanned images according to the orientation of documents to be scanned.
- ⑯ **Reverse Image**
When the [Black and White], [Error Diffusion] or [Advanced Text Enhancement] mode is selected, black and white are reversed in the scanned image.
- ⑰ **Text Orientation Recognition**
Detects the text orientation in scanned images and rotates the images in 90° increments to normalize text orientation.
- ⑱ **Rapid recovery system**
Select this function to prevent error reporting to the application program when feeding is interrupted due to a paper jam or similar error while scanning. After fixing the cause of the interruption, scanning can be quickly resumed with standard operations.

Canon DR-2580C Job Registration Tool Quick Guide

Keep this Quick Guide near the scanner for ready reference.

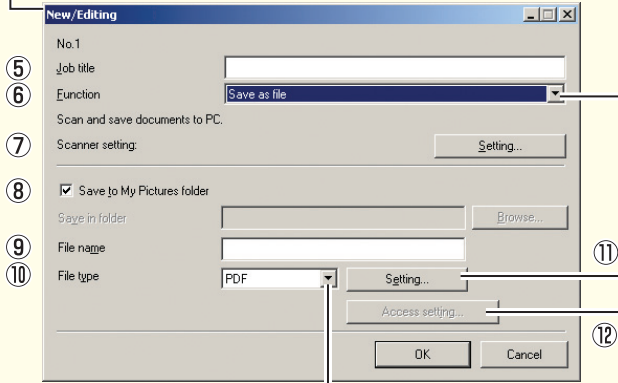

Job Registration Tool Dialog Box

- ① **List of Job Button settings**
Shows the settings registered for Job buttons.
- ② **Job Button (1-3)**
Correspond to the Job buttons on the scanner. The Editing dialog box opens when you click these buttons.
- ③ **[Admin] button**
Opens the Admin dialog box.
- ④ **[Initialize] button**
Returns the Job Buttons to their factory settings.

Editing Dialog Box

- ⑤ **Job title**
Enter the title of the job to display in the list of Job button settings.
☞ You can enter up to 29 single-byte alphanumeric or kana characters.
- ⑥ **Function**
Selects the function assigned to the Scan button.
☞ The contents of the Editing dialog box are determined by the selected function.
- ⑦ **Scanner setting**
Opens the TWAIN driver's basic setting dialog box to configure the scanner.
- ⑧ **Save to My Pictures folder**
Saves scanned images in the My Pictures folder in My Documents.
☞ When this check box is not selected, you can specify the destination folder for saving images.
- ⑨ **File name**
Specifies the file name.
☞ Image file names are created by appending a time stamp to the specified file name.
- ⑩ **File type**
Selects the file format for saved images.
☞ The [Setting] button is enabled when [PDF] or [TIFF] is selected.
- ⑪ **[Setting] button**
This button is enabled when the PDF or TIFF file type is selected, and opens the PDF or TIFF Setting dialog box.
☞ The PDF setting dialog box provides [Compression] and [OCR] settings.
☞ The TIFF setting dialog box provides [Multi-tiff setting] and [Compression] settings.
- ⑫ **[Access setting] button**
This button is available when using Windows 2000/XP, and opens the Access setting dialog box.
☞ Enter the correct User name and Password to obtain access to a shared network folder.
- ⑬ **Printer**
Shows the default printer.
Printer settings can be changed by clicking the [Printer setting] button.
- ⑭ **Save Image**
Select this check box to save images scanned using the [Scan To Mail] Function.
- ⑮ **Launcher**
Starts applications set with the Windows event function. See the user's guide for detailed information. (see P.40.)

PDF/TIFF Settings

- ⑯ **Compression rate**
Selects [Normal] or [High Compression] rate.
☞ [High Compression] reduces the file's size, but also reduces the image quality slightly.
☞ [High Compression] is useful for grayscale and color images.
- ⑰ **Language for OCR/Apply OCR**
Recognizes printed text in a document as characters, and adds text data to the PDF file.
☞ When the [Apply OCR] check box is selected, recognized text data is saved where the printed text is located in the PDF file.
☞ When OCR is applied, Deskew is enabled, regardless of the configured settings for the TWAIN driver.
- ⑱ **Multi-tiff setting**
Selects the saving method for multiple page images.
☞ [One page] creates one file for one page with the number of TIFF files corresponding to the number of pages.
☞ [Multi pages] saves the images for all of the pages as one file.
- ⑲ **Compression**
Compresses image files before saving them.
☞ Black and white images are compressed as CCITT Group 4 images, while grayscale and color images are compressed as JPEG images.

Admin Dialog Box

- ⑳ **Capacity Warning Settings**
Specifies the folder for saved image files, and the capacity of that folder, in advance.
☞ After specifying the folder and starting to scan, a warning message is displayed when the specified capacity is reached while scanning.
- ㉑ **Register Folder/Display Warning Dialog**
The [Capacity Observed Folder] and [Warning Size] items are enabled by specifying a [Register Folder] (number) and selecting the [Display Warning Dialog] check box.
☞ When the capacity warning is displayed, follow the displayed instructions to continue scanning.
- ㉒ **Show Monitor Dialog**
The Monitor for DR2580C dialog box appears when the Scan button is pressed, and the scan progress is displayed.
- ㉓ **Maximum size of attached file**
Specifies a maximum size for image files to be attached to e-mails. This Quick Guide describes settings for the Job Registration Tool. Click the Help button for details.
- ㉔ **Job Backup/Restore**
Backs up and restores registered jobs.
☞ Backup files can be restored on another DR-2580C document scanner.

This Quick Guide describes settings for the Job Registration Tool. Click the Help button for details.
